the new edition of a bestseller this book is one of the leading educational resources for energy manager or energy professional as well as new people enter the field of energy management and energy engineering it is the most widely used college and university textbook as well as one of the most widely used books for professional development training new topics include energy auditing energy bills life cycle costing electrical distribution systems boilers steam distribution systems control systems and

computers energy systems maintenance insulation compressed air renewable energy sources and water management distributed generation and creating green buildings

this invaluable resource offers planning processes and practical tools for fashioning and implementing a lifelong curriculum includes a cd rom with powerpoint presentations for each chapter as well as worksheets and handouts
