plasticity is concerned with the mechanics of materials deformed beyond their elastic

limit a strong knowledge of plasticity is essential for engineers dealing with a wide range of engineering problems such as those encountered in the forming of metals the design of pressure vessels the mechanics of impact civil and structural engineering as well as the understanding of fatigue and the economical design of structures theory of plasticity is the most comprehensive reference on the subject as well as the most up to date no other significant plasticity reference has been published recently making this of great interest to academics and professionals this new edition presents extensive new material on the use of computational methods plus coverage of important developments in cyclic plasticity and soil plasticity a complete plasticity reference for graduate students researchers and practicing engineers no other book offers such an up to date or comprehensive reference on this key continuum mechanics subject updates with new material on computational analysis and applications new end of chapter exercises plasticity is a key subject in all mechanical engineering disciplines as well as in manufacturing engineering and civil engineering chakrabarty is one of the subject s leading figures

postcolonial theory has become enormously influential as a framework for understanding the global south it is also a school of thought popular because of its rejection of the supposedly universalizing categories of the enlightenment in this devastating critique mounted on behalf of the radical enlightenment tradition vivek chibber offers the most comprehensive response yet to postcolonial theory focusing on the hugely popular subaltern studies project chibber shows that its foundational arguments are based on a series of analytical and historical misapprehensions he demonstrates that it is possible to affirm a universalizing theory without succumbing to eurocentrism or reductionism postcolonial theory and the specter of capital promises to be a historical milestone in contemporary social theory

introduces readers to the modes of literary and cultural study of the previous half century a companion to literary theory is a collection of 36 original essays all by noted scholars in their field designed to introduce the modes and ideas of contemporary literary and cultural theory arranged by topic rather than chronology in order to highlight the relationships between earlier and most recent theoretical developments the book groups its chapters into seven convenient sections i literary form narrative and poetry ii the task of reading iii literary locations and cultural studies iv the politics of literature v identities vi bodies and their minds and vii scientific inflections allotting proper space to all areas of theory most relevant today this comprehensive volume features three dozen masterfully written chapters covering such subjects as anglo american new criticism chicago formalism russian formalism derrida and deconstruction empathy affect studies foucault and poststructuralism marx and

marxist literary theory postcolonial studies ethnic studies gender theory freudian psychoanalytic criticism cognitive literary theory evolutionary literary theory cybernetics and posthumanism and much more features 36 essays by noted scholars in the field fills a growing need for companion books that can guide readers through the thicket of ideas systems and terminologies presents important contemporary literary theory while examining those of the past the wiley blackwell companion to literary theory will be welcomed by college and university students seeking an accessible and authoritative guide to the complex and often intimidating modes of literary and cultural study of the previous half century

in this volume leading scholars from around the world suggest that radical ideologies have shaped complex historical processes in east asia by examining how intellectuals and activists interpreted rethought and criticized marxism in east asia the contributors to this volume ask how we can use marxism to understand east asia in a global capitalist world and where the problems that marxism highlighted including imperialism domination and inequality are increasingly prevalent the volume draws on various disciplines to reinterpret marx and shed light on the complex dynamics of global capitalism in various historical national contexts the distinguished contributors illuminate rethink and make accessible highly complex marxist concepts such as the question of class contradiction the temporalities of capitalism real and formal subsumption relative surplus value and the commodity form the question of class and the proletariat at a time when people around the world are struggling to cope with the crises of global capitalism this volume on regional responses to capitalism is especially welcome it will be of interest to students and scholars of east asian studies social and political theory sociology and globalization studies

this book constitutes the refereed conference proceedings of the 9th international conference on intelligent computing icic 2013 held in nanning china in july 2013 the 74 revised full papers presented were carefully reviewed and selected from numerous submissions and are organized in topical sections on neural networks nature inspired computing and optimization cognitive science and computational neuroscience knowledge discovery and data mining evolutionary learning and genetic algorithms machine learning theory and methods natural language processing and computational linguistics fuzzy theory and models soft computing unsupervised and reinforced learning intelligent computing in finance intelligent computing in petri nets intelligent data fusion and information security virtual reality and computer interaction intelligent computing in pattern recognition intelligent computing in image processing intelligent computing in robotics complex systems theory and methods

this 2007 book brings together a team of world class critical theory scholars

prés de l'éd while refuting contemporary fashionable discourse on history from below which is based on cultural determinism the author of the present volume urges scholars to use their own innate creativity as human agency collectively to build an alternative theoretical framework that can open up the possibility of creating an alternative state of being and alternative kinds of societies while suggesting one of many possible alternatives the author has attempted to reinstate in the present volume the notion of human agency as human being's innate capacity for creativity which is closely related to the concept of humaneness author believes that such interpretation will open up the possibility of developing a new theoretical framework that will be devoid of binaries such as traditional modern core periphery progressive backward national global based on these ideas the present volume is an attempt to show one of many possibilities of writing a history of the world from an alternative perspective derived from the experiences of the social formations cultural formations and class struggles in india the focus on india is important not merely as a local history or colonial history because it represents the historical experiences of one billion plus people with all possible historical political economic and cultural scenarios and its interactions with many other societies over time author hopes that suggestions hypothesized in this volume might help in writing histories everywhere of women working people oppressed people oppressed societies as well as of oppressive societies from the vantage point of their own societies and their interactions with other societies without using binary terms such history writing will allow oppressed people and oppressed societies to break away from the prevailing notion of inevitable fate about their present miserable condition and hopeless future choices as they are made to believe about the inevitability of globalization about the so called development and their consequences
