at the intersection of translation studies and latin american literary studies the translator s visibility examines contemporary novels by a cohort of writers including prominent figures such as cristina rivera garza César Aira Mario Bellatin Valeria Luiselli and Luis Fernando Verissimo who foreground translation in their narratives drawing on latin america s long tradition of critical and creative engagement of translation these novels explicitly visibly use major tropes of translation theory such as gendered and spatialized metaphors for the practice and the concept of untranslatability to challenge the strictures of intellectual property and propriety while shifting asymmetries of discursive authority above all between the original as a privileged repository of meaning and translation as its hollow emulation in this way the translator s visibility show that translation not only serves to renew national literatures through an exchange of ideas and forms when rendered visible it can help us reimagine the terms according to which those exchanges take place ultimately it is a book about

conceived of as a set of fragmentary manuscripts from an unpublished joseph roth novel jacob the mutant is a novella in a perpetual state of transformation a story about a man named jacob an ersatz rabbi and owner of a roadside tavern but when reality shifts so does jacob mutating into another person entirely

this book looks at neobaroque latin american fiction poetry essay and performance from the 1970s to the early 2000s in order to explore the cultural hybridization and transgressive identity transformations at play in these works it shows how the ornamental style and boldly experimental techniques are an effective strategy in presenting decentered identities in sexually ambiguous multiethnic interracial transcultural and mutant characters as well as in metafictional narrators and authors in this way the book demonstrates the potential of neobaroque works to destabilize normative essentialist and binary categories of identity the study focuses on latin america as a cultural macroregion drawing on examples from a variety of countries including argentina uruguay chile bolivia brazil cuba mexico and the us mexican border drawing on gender queer trans and chicana feminist theory it argues for an alternative approach to a model of the self or a theory of selfhood derived from the exuberant style and experimental techniques of the neobaroque

from the perspective of latin american studies this volume offers a critical contribution to the current debate on world literature it is structured around three conceptual blocks gatekeepers as the dispositives and actors mediating the international circulation of literature translation as an unavoidable but always problematic mechanism and local literatures as modes of writing that remain intrinsically tied to their contexts
