these essays survey the histories the theories and the fault lines that compose the field of memory research drawing on the advances in the sciences and in the humanities they address the question of how memory works highlighting transactions between the interiority of subjective memory and the larger fields of public or collective memory

in recent years the field of memory studies has emerged as a key approach in the humanities and social sciences and has increasingly shown its ability to open new windows on nordic studies as well the entries in this book document the work to date of this approach on the pre modern nordic world mainly the viking age and the middle ages but including as well both earlier

and later periods given that memory studies is an ever expanding critical strategy the approximately eighty contributors in this volume also discuss the potential for future research in this area topics covered range from texts to performance to visual and other aspects of material culture all approached from within an interdisciplinary framework international specialists coming from such relevant fields as archaeology mythology history of religion folklore history law art literature philology language and mediality offer assessments on the relevance of memory studies to their disciplines and show it at work in case studies finally this handbook demonstrates the various levels of culture where memory had a critical impact in the pre modern north and how deeply embedded the role of memory is in the material itself

type 2 diabetes is estimated to affect 120 million people worldwide and according to projections from the world health organization this number is expected to double over the next two decades novel cost effective strategies are needed to reverse the global epidemic of obesity which is driving the increased occurrence of type 2 diabetes and to less the burden of diabetic vascular complications in the current volume topics in the prevention treatment and complications of type 2 diabetes experts in biology and medicine from four different continents contribute important information and cutting edge scientific knowledge on a variety of topics relevant to the management and prevention of diabetes and related illnesses

music and heritage provides new thinking about the diverse ways people engage with heritage by exploring the relationships that exist between music place and identity the book illustrates how people form attachments to place and how such attachments are represented by sound and music making presenting case studies and perspectives from across a range of genres the volume argues that combining music with heritage provides an alternative and productive opportunity to think about heritage values and place attachment contributions to this edited collection use a diversity of methods perspectives cues and genres to reflect critically on issues related to these and other interconnections in ways that encourage new thinking about the character meaning and purpose of cultural heritage and the various ways in which people can interact with it through sound thus re encountering the supposedly familiar world around them taking heritage studies musicology and place making research in new directions music and heritage will be of interest to academics and students engaged in the study of heritage history music geography and anthropology it will also be relevant to those with an interest in how music relates to place making and place attachment as well as to practitioners and policymakers working in the planning design and creative sectors
