the first picture that was ever painted was a portrait or an imitation of something that the painter had seen so in sculpture the first statue or bas relief was an attempt to reproduce some being or object that the sculptor had seen or to make a work which combined portions of several things that he had observed but in architecture this was not true no temples or tombs or palaces existed until they had first taken form in the mind and imagination of the builders and were created out of space and nothingness so to speak thus painting and sculpture are imitative arts but architecture is a constructive art and while one may love pictures or statues more than the work of the architect it seems to me that one must wonder most at the last we do not know how long the earth has existed and in studying the most ancient times of which we have any accurate knowledge we come upon facts which prove that men must have lived and died long before the dates of which we can speak exactly the earliest nations of whose architecture we can give an account are called heathen nations and their art is called ancient or heathen art and this comes down to the time when the roman emperor constantine was converted to christianity and changed the roman capitol from rome to constantinople in the year of our lord 328 the buildings and the ruins which still remain from these ancient times are in egypt assyria persia judea asia minor greece etruscia and rome many of these have been excavated or uncovered as during the ages that have passed since their erection they had been buried away from sight by the accumulation of earth about them these excavations are always going on in various countries and men are ever striving to learn more about the wonders of ancient days and we may hope that in the future as marvellous things may be revealed to us as have been shown in the past
