nanoelectronics is one of the most important technologies of nanotechnology it plays vital role in the field of engineering and electronics nanoelectronics make use of scientific techniques at atomic scale for developing the nano machines the main target is to reduce the size risk factor and surface areas of the materials and

molecules machines under nanoelectronic process under goes the long range of manufacturing steps each with accurate molecular treatment semiconductor electronics have seen a sustained exponential reduce in size and cost and a similar augment in performance and level of integration over the last thirty years the silicon roadmap is laid out for the next ten years after that either economical or physical barriers will pose a huge challenge the former is connected to the difficulty of making a profit in view of the exorbitant costs of building the necessary manufacturing capabilities if present day technologies are extrapolated the latter is a direct consequence of the shrinking device size leading to physical phenomena impeding the operation of current devices the transistor is the building block to a modern processor the current silicon designed transistors are going to hit their physical limit not merely the actualization of moore s law but also the problems with heat dissipation wire connections and the materials we use to create them hence nanotechnology helps us to look at new ways information processing at a better speed and measure a promising alternative to the imminent challenges from the cmos based computing is to focus on other alternatives of nano scale precision chemically assembled electronic nanotechnology caen is a promising technology which uses self alignment to construct electronic circuits from nano scale devices that take advantage of quantum mechanical effects this book is intended as an introduction to the field of nanotechnology for nanoelectronics vendors researchers and students who want to start thinking about the potential opportunities afforded by these emerging scientific developments
