the theory of nonlinear elliptic equations is currently one of the most actively developing branches of the theory of partial differential equations this book investigates boundary value problems for nonlinear elliptic equations of arbitrary order in addition to monotone operator methods a broad range of applications of topological methods to nonlinear differential equations is presented solvability estimation of the number of solutions and the branching of solutions of nonlinear equations skrypnik establishes by various procedures a priori estimates and the

regularity of solutions of nonlinear elliptic equations of arbitrary order also covered are methods of homogenization of nonlinear elliptic problems in perforated domains the book is suitable for use in graduate courses in differential equations and nonlinear functional analysis

time dependent reliability theory and its applications introduces the theory of time dependent reliability and presents methods to determine the reliability of structures over the lifespan of their services the book contains state of the art solutions to first passage probability derived from the theory of stochastic processes with different types of probability distribution functions including gaussian and non gaussian distributions and stationary and non stationary processes in addition it provides various methods to determine the probability of failure over time considering different failure modes and a methodology to predict the service life of structures sections also cover the applications of time dependent reliability to prediction of service life and development of risk cost optimized maintenance strategy for existing structures this new book is for those who wants to know how to predict the service life of a structure buildings bridges aircraft structures etc and how to develop a risk cost optimized maintenance strategy for these structures presents the basic knowledge required to predict service life and develop a maintenance strategy for infrastructure explains how to predict the remaining safe life of the infrastructure during its lifespan of operation describes how to carry out maintenance for an infrastructure to ensure its safe and serviceable operation during the designed service life

this book deals with the existence and stability of solutions to initial and boundary value problems for functional differential and integral equations and inclusions involving the riemann liouville caputo and hadamard fractional derivatives and integrals a wide variety of topics is covered in a mathematically rigorous manner making this work a valuable source of information for graduate students and researchers working with problems in fractional calculus contents preliminary background nonlinear implicit fractional differential equations impulsive nonlinear implicit fractional differential equations boundary value problems for nonlinear implicit fractional differential equations boundary value problems for impulsive nifde integrable solutions for implicit fractional differential equations partial hadamard fractional integral equations and inclusions stability results for partial hadamard fractional integral equations and
