i would like to use this preface to thank some persons and institutions which have been important during the various stages of writing this book first of all i am grateful to kluwer academic publishers for giving me the opportunity to write this book i started

writing the book in 1998 while i was working at the departamento d economia i d historia economica at universidad autonoma de barcelona and continued the writing job from september 1998 to september 2000 at the departamento de economfa at universidad carlos iii de madrid the book has been completed while i was visiting the department of quantitative economics at the university of maastricht from october 2000 to august 2001 i wish to thank these three departments for their hospitality the book has improved substantially by comments and critique from the following persons who have read parts of the manuscript geir asheim eric van damme janos flesch mari angeles de frutos diego moreno hans peters antonio romero and dries vermeulen i should also mention my discussions with peter wakker about the decision theoretic foundations of noncooperative game theory which have had an important impact on various parts of the book finally i wish to express my warmest gratitude to my parents my brother and my sister and last but not least to cati to whom i dedicate this book

this book gives a concise presentation of the mathematical foundations of game theory with an emphasis on strategic analysis linked to information and dynamics it is largely self contained with all of the key tools and concepts defined in the text combining the basics of game theory such as value existence theorems in zero sum games and equilibrium existence theorems for non zero sum games with a selection of important and more recent topics such as the equilibrium manifold and learning dynamics the book quickly takes the reader close to the state of the art applications to economics biology and learning are included and the exercises which often contain noteworthy results provide an important complement to the text based on lectures given in paris over several years this textbook will be useful for rigorous up to date courses on the subject apart from an interest in strategic thinking and a taste for mathematical formalism the only prerequisite for reading the book is a solid knowledge of mathematics at the undergraduate level including basic analysis linear algebra and probability

the global higher education sector has changed dramatically as universities continue to face unprecedented challenges associated with the covid 19 pandemic many are struggling to navigate this crisis while maintaining high quality course delivery ensuring strong student recruitment numbers and providing clear communication to staff and students issues have emerged at an exponential rate and coping with the pandemic has been particularly difficult for universities as they serve several functions such as being educational institutions as well as major employers leadership and management strategies for creating agile universities

reflects on the challenges that higher education institutions have faced during the pandemic and the associated projected socio economic impact yet to be felt it also considers how different universities have addressed the challenges so as to learn what has and has not worked and speculates what future implications exist for the vision of a new higher education sector in a changing world covering topics such as developmental leadership it governance and lifelong learning it is ideal for policymakers industry professionals academicians researchers governors decision makers teachers and students
