the present book on adoption of improved chulha by rural families is a part of doctoral research study conducted in gujarat the study mainly concentrated on adoption level of improved chulhas constructed in the villages on subsidy basis by government and ngos under national programme on improved chulha the technical backup support unit tbsu established under npic at home management department which caters to the needs of npic in gujarat state and union territories of daman diu and dadra nagar and haveli developed pottery ceramic liners for chulhas which were installed since 1991 92 in different parts of gujarat state by panchayat and rural housing development department the department of government of gujarat and nodal agencies like gujarat energy development agency hence this research study was taken up to answer questions like problems faced by families in procuring fuel for cooking awareness level of the women about scarcity of cooking fuel management practices in cooking and fuel use level of participation in npic extent of adoption of mc in daily cooking and factors account for differential levels of adoption of chulha it has also probed into association between extent of adoption of mc and selected situational personal and family variables of beneficiaries of npic

this book constitutes the refereed proceedings of the 4th international workshop on algorithms in bioinformatics wabi 2004 held in bergen norway in september 2004 the 39 revised full papers presented were carefully reviewed and selected from 117 submissions among the topics addressed are all current issues of algorithms in bioinformatics such as exact and approximate algorithms for genomics genetics sequence analysis gene and signal recognition alignment molecular evolution phylogenetics structure determination or prediction gene expression and gene networks proteomics functional genomics and drug design

progress in physics has been created for publications on advanced studies in theoretical and experimental physics including related themes from mathematics

convective heat transfer is the result of fluid flowing between objects of different temperatures thus it may be the objective of a process as in refrigeration or it may be an incidental aspect of other processes this monograph reviews in a concise and unified manner recent contributions to the principles of convective heat transfer for single and multi phase systems it summarizes the role of the fundamental mechanism discusses the governing differential equations describes approximation schemes and phenomenological models and examines their solutions and applications after a review of the basic physics and thermodynamics the book divides the subject into three parts part 1 deals with single medium transfer specifically with intraphase transfers in single phase flows and with intramedium transfers in two phase flows part 2 deals with fluid solid transfer processes both in cases where the interface is small and in cases where it is large as well as liquid liquid transfer processes part 3 considers three media addressing both liquid solid solid and gas liquid solid systems

the aim of the annual alenex workshop is to provide a forum for the presentation of original research in the implementation and experimental evaluation of algorithms and data structures this research presents significant studies in experimental analysis or in the implementation testing and evaluation of algorithms for realistic environments and scenarios the paper presentations address specific applied areas that present unique challenges in their underlying algorithmic problems as well as methodological issues and standards in the context of empirical research on algorithms and data structures analysis of algorithms and associated combinatorial structures the papers study properties of fundamental combinatorial structures that arise in practical computational applications such as permutations trees strings tries and graphs and address the precise analysis of algorithms for processing such structures including average case analysis analysis of moments extrema and distributions and probabilistic analysis of randomized algorithms this proceedings collects extended versions of the 14 papers that were selected for presentation from the alenex workshop and 10 papers selected for presentation from the analco workshop
