string art is a well known and popular activity that uses string a board and nails to produce artistic images although there are variations that use different modalities this activity is beloved

because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds the downside of this highly tactile activity is that it is quite time consuming and rigid by contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously electronic string art rhythmic mathematics invites readers to use the author's digital resources available on the esa website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections features readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections sections are lessons that were created so that they could be digested in a single sitting these sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting an open ended inherently flexible teaching resource for elementary middle and high school level mathematics the most mathematically challenging sections or portions of a section are designated *ma* and may not be accessible to elementary and middle school readers will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics includes exercises solutions and many online digital resources these qr codes take you to these digital resources one takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in section 25 5 the other takes you to the esa web page with additional links to a variety of resources

this book presents original research applying mathematics to musical rhythm with a focus on computational methods theoretical approaches analysis of rhythm in folk and global music traditions syncopation and maximal evenness it honours the legacy of computer scientist and music theorist godfried toussaint in addition to addressing a topic pioneered by toussaint application of mathematics to representation of musical rhythms the volume also builds upon his interest in analysis of music traditions outside the european classical canon and the use of computational methods empirical contributions include a study of timing in scandinavian polska performance showing that timing interacts with rhythmic features and a study of vocal melody rhythm in pre and post millennial popular music showing significant differences in tempo rhythmic density and repetition in the two corpora theoretical contributions include a survey of timeline rhythms of african and african diasporic musics showing the prevalence of rhythms of a special type related to maximal evenness an application of matrix algebra to rhythm and syncopation with analysis of clave rhythms a ragtime corpus and balinese gong cycles and a mathematical development of a new classification of smooth rhythms using a shadow rhythm algorithm suggested by toussaint the volume also includes an original composition by tom johnson and a personal recollection of toussaint by francisco gómez martín this volume will be a key resource for academics researchers and advanced students of music musicology music analyses mathematical music theory computational musicology and music informatics it was originally published as a special issue of the journal of mathematics and music

extensive programmed laboratory tests involving some 400 asphalt emulsion slurry seals aess were conducted thirteen aggregates including nine iowa sources a quartzite a synthetic aggregate haydite a limestone stone from nebraska and a chat aggregate from kansas were tested in combination with four emulsions and two mineral fillers resulting in a total of 40 material combinations a number of meetings were held with the iowa dot engineers and 12 state highway departments that have had successful slurry seal experiences and records and several slurry seal contractors and material and equipment suppliers were contacted asphalt emulsion slurry seal development uses characteristics tests and design methods were thoroughly reviewed in conjunction with iowa s experiences through these meetings and discussions and through a literature search covering some 140 articles and 12 state highway department specifications it was found that while asphalt emulsion slurry seals when properly designed and constructed can economically improve the quality and extend the life of existing pavement surface experiences with them had been mixed due to the many material slurry and construction variables that affect their design construction and performance the report discusses those variables identified during the course of the project and makes recommendations concerning design procedures design criteria specifications and the means of evaluating them
