why is a forgery worth so much less than an original work of art what s so funny about someone slipping on a banana peel why as freud once asked is a man willing to kiss a woman passionately but not use her toothbrush and how many times should you baptize a two headed twin descartes baby answers such questions questions we may have never thought to ask about such uniquely human traits as art humour faith disgust and morality in this thought provoking and fascinating account of human nature psychologist paul bloom contends that we all see the world in terms of bodies and souls even babies have a rich understanding of both the physical and social worlds they expect objects to obey principles of physics and they re startled when things disappear or defy gravity they can read the emotions of adults and respond with their own feelings of anger sympathy and joy this perspective remains with us throughout our lives using his own researches and new ideas from philosophy evolutionary biology aesthetics theology and neuroscience bloom shows how this way to making sense of reality can explain what makes us human the myriad ways that our childhood views of the world undergo development throughout our lives and profoundly influences our thoughts feelings and actions is the subject of this richly rewarding book

psychologists have long believed that we begin life as moral blank slates most of us take it for granted that babies are born selfish and that it is the role of society and especially parents to transform them from little sociopaths into civilised beings now in just babies paul bloom argue that humans are in fact hardwired with a sense of morality drawing on groundbreaking research bloom demonstrates that even before they can speak or walk babies judge the

goodness and badness of others actions act to soothe those in distress and feel empathy guilt pride and righteous anger still this innate morality is limited we are naturally hostile to strangers prone to parochialism and bigotry drawing on insights from psychology behavioural economics evolutionary biology and philosophy bloom explores how we have come to surpass these limitations along the way he examines the morality of chimpanzees criminals religious extremists and ivy league professors and explores out often puzzling moral feelings about sex politics religion and race bloom rejects the fashionable view that adult morality is driven mainly by gut feelings and unconscious biases just as reason has driven our great scientific discoveries it is reason and deliberation that makes possible our moral discoveries ultimately it is through our imagination our compassion and our uniquely human capacity for rational thought that we can transcend the primitive sense of morality we were born with becoming more than just babies vivid witty and intellectually probing just babies offers a radical new perspective on our moral lives

for charles fernyhough the birth of his daughter athena was an opportunity to re evaluate much of what he had learned as a researcher in developmental psychology drawing on the detailed notes he made during her infancy fernyhough uses athena s story to explain how a child s mind develops before the age of three tapping into a parent s wonder at the processes of psychological development in an engaging child centred way it is written with a father s tenderness and a novelist s empathy and style

adults tend to take language for granted until they have to learn a new one then they realize how difficult it is to get the pronunciation right to acquire the meaning of thousands of new words and to learn how those words are put together to form sentences children however have mastered language before they can tie their shoes in this engaging and accessible book william o grady explains how this happens discussing how children learn to produce and distinguish among sounds their acquisition of words and meanings and their mastery of the rules for building sentences how children learn language provides readers with a highly readable overview not only of the language acquisition process itself but also of the ingenious experiments and techniques that researchers use to investigate his mysterious phenomenon it will be of great interest to anyone parent or student wishing to find out how children acquire language

please note this is a companion version not the original book sample book insights 1 morality is the capacity to judge and condemn others we are naturally kind to others at least some of the time but we possess ugly instincts as well

and these can metastasize into evil 2 there are many types of moral violations the most basic is hitting someone which is a violation of a moral rule that all humans respond to other examples include throwing a brick at someone sideswiping a car or killing someone s dog 3 there is a difference between moral wrongs and moral rightness while some things may be considered morally wrong they may not necessarily be harmful morality also encompasses questions of rightness as demonstrated by a study of spontaneous helping in toddlers 4 morality is broad and includes both the harsh and the softer elements it is learned and it varies between cultures

this revised edition of ray cattell s bestselling textbook aims to give readers the background necessary to form their own views on the debate as to how children really learn language
