Quantitative Reasoning, and sometimes Science or Writing. Each section has its unique question types and answer strategies. Verbal Reasoning Section

Common question types: - Reading comprehension - Sentence equivalence - Text completion

Analyzing answers: For each question, Kaplan emphasizes understanding context clues, identifying keywords, and eliminating distractors. Let's look at typical answer rationales: - Example: A sentence completion question asks for the word that best fits the blank. The correct answer often shares a similar tone or connotation with the surrounding text. Quantitative Reasoning Section

Question types include: - Algebra - Geometry - Data analysis and interpretation

Answer strategies: Kaplan advocates for systematic approaches: - Plug-in methods: Testing answer choices directly to see which satisfies the question. - Backsolving: Starting from the answer choices to work backwards. - Estimation: Using approximation techniques to narrow down options. Sample explanation: Suppose a question asks for the area of a triangle with given side lengths. The solution involves applying Heron's formula, and the answer choices are approximate.
