we bring into full light some excerpts on musical subjects which were until now scattered throughout the most famous scientific texts the main scientific and musical cultures outside of europe are also taken into consideration the first and most important property to underline in the scientific texts examined here is the language they are written in this means that our multicultural history of the sciences necessarily also becomes a review of the various dominant languages used in the different historical contexts in this volume the history of the development of the sciences is told as it happened in real contexts not in an alienated ideal world

definitive biography covers kepler s scientific accomplishments laws of planetary motion work with calculus optics more plus public and personal life more introduction and notes by owen gingerich

this impressive volume is the first attempt to look at the intertwined histories of natural law and the laws of nature in early modern europe these notions became central to jurisprudence and natural philosophy in the seventeenth century the debates that informed developments in those fields drew heavily on theology and moral philosophy and vice versa historians of science law philosophy and theology from europe and north america here come together to address these central themes and to consider the question was the emergence of natural law both in european jurisprudence and natural philosophy merely a coincidence or did these disciplinary traditions develop within a common conceptual matrix in which theological philosophical and political arguments converged to make the analogy between legal and natural orders compelling this book will stimulate new debate in the areas of intellectual

history and the history of philosophy as well as the natural and human sciences in general

taking into account the most important results of the scholarly literature since 1973 and the best polish scholarship of the past century this is the first comprehensive study of copernicus s achievement in english that examines copernicus s path to heliocentrism from the perspective of late medieval philosophy the renaissance recovery of ancient literature and science and early modern editions of books that copernicus used the principal goals are to explain his commitment to the existence of celestial spheres and the logical foundations for his views about hypotheses in doing so the work elucidates the logical and philosophical background that contributed to his accomplishments and explains the limitations of his achievement medieval and early modern science 12

michael maestlin 1550 1631 professor of mathematics at the university of tübingen was a leading protagonist of the astronomical and cosmological revolution that began with copernicus famous for first introducing copernicanism to kepler maestlin also wrote important treatises on the supernova of 1572 and the comet of 1577 that mark significant steps in the elimination of celestial immutability and the reinforcement of the copernican worldview this first critical edition of maestlin s german manuscript treatise on the comet of 1618 is accompanied by an english translation and a thorough commentary an extensive introduction situates maestlin s treatise in the broader context of the contemporary politico religious conflict and cosmological discussion newly expanded to the debate on sunspots discovered with the telescope
