africa was partitioned and colonized by the europeans after military conquest came the commercial exploitation of the wealth of africa the intensity of resistance to colonization varied from one region to another but a new economic and social system linked with colonization was put in place bringing about unprecedented demographic and political change publisher s description

in a vast and all embracing study of africa from the origins of mankind to the south african general election of 1994 john iliffe refocuses african history on the peopling of an environmentally hostile continent africans have been pioneers struggling against disease and nature and their social economic and political institutions have been designed to ensure survival and maximise numbers these institutions enabled them to survive the slave trade and colonial invasion but in the context of medical progress and other twentieth century innovations the same institutions have bred the most rapid population growth the world has ever seen this demographic growth has lain behind the collapse of colonial rule the disintegration of apartheid and the instability of contemporary nations the history of the continent is thus a single story binding living africans to their earliest human ancestors

most histories seek to understand modern africa as a troubled outcome of nineteenth century european colonialism but that is only a small part of the story in this celebrated book beautifully translated from the french edition the history of africa in the nineteenth century unfolds from the perspective of africans themselves rather than the european powers it was above all a time of tremendous internal change on the african continent great jihads of muslim conquest and conversion swept over west africa in the interior warlords competed to control the internal slave trade in the east the sultanate of zanzibar extended its reach via coastal and interior trade routes in the north egypt began to modernize while algeria was colonized in the south a series of forced migrations accelerated spurred by the progression of white settlement through much of the century african societies assimilated and adapted to the changes generated by these diverse forces in the end the west s technological advantage prevailed and most of africa fell under european control and lost its independence yet only by taking into account the rich complexity of this tumultuous past can we fully understand modern africa from the colonial period to independence and the difficulties of today

what wove the african continent into the rich fabric of cultures and peoples that it is today where did ancient culture trade and civilization begin how did the african people survive and thrive despite european colonization and apartheid these are just some of the questions you ll find answers to in africa african history from ancient egypt to modern south africa africa is a vast continent whose waters fertile lands minerals and diverse wildlife nurtured humankind since ancient times until european colonization and exploitation caused immeasurable suffering and loss to understand how africa developed thrived suffered and emerged into the rich tapestry of peoples that it is today take a trip back to the ancient river Nile and the east african coast witness the development of small settlements into three distinct cultures the carthaginian empire grow and flourish as an economic and commercial power the settlement of the zimbabwe plateau and the construction of enormous stone cities the emergence of the kingdom of kongo and its expansion through peaceful trade and alliances the upheaval atrocities wars and eventual stability created by european colonization the founding of the congo free state and the growth of forced labor to extract valuable resources from the land the decolonization of africa and the return of territorial sovereignty and independence the forced racial segregation under apartheid and the birth of a new constitution that ended it the founding of the african union to establish norms across the continent
