This book distills the knowledge gained from research into atoms in molecules over the last 10 years into a unique handy reference throughout. The authors address a wide audience such that this volume may equally be used as a textbook without compromising its research oriented character. Clearly structured, the text begins with advances in theory before moving on to theoretical studies of chemical bonding and reactivity. There follow separate sections on solid state and surfaces as well as experimental electron densities before finishing with applications in biological sciences and drug design. The result is a must have for physicochemists, chemists, physicists, spectroscopists and materials scientists.

The 23rd International Free Electron Laser Conference and the 8th FEL Users Workshop were held on August 20-24th 2001 at the Technische Universität Darmstadt TUD in Germany.
