understanding biblical theology clarifies the catch all term biblical theology a movement that tries to remove the often held dichotomy between biblical studies for the church and as an academic pursuit this book examines the five major schools of thought regarding biblical theology and handles each in turn

defining and giving a brief developmental history for each one and exploring each method through the lens of one contemporary scholar who champions it using a spectrum between history and theology each of five types of biblical theology are identified as either more theological or more historical in concern and practice biblical theology as historical description james barr biblical theology as history of redemption d a carson biblical theology as worldview story n t wright biblical theology as canonical approach brevard childs biblical theology as theological construction francis watson a conclusion suggests how any student of the bible can learn from these approaches

one of the thorniest problems in theological study is the relationship between biblical studies on the one hand and constructive theology on the other theologians know that the bible is the core source document for theological construction and hence that they must be in conversation with the best in critical study of scripture for many biblical scholars the point of what they do is to help the biblical text speak to today s church and world and hence they would do well to be in conversation with contemporary theology yet too often the two groups fail to engage each other s work in significant and productive ways the purpose of the library of biblical theology and this introductory volume to it is to bring the worlds of biblical scholarship and constructive theology together it will do so by reviving biblical theology as a discipline that describes the faith of the biblical periods on the one hand and on the other hand articulates normative understandings of modern faith and practice in this volume the authors begin by providing an overview of the history and possible future of biblical theology they introduce biblical theology as a fundamentally contrastive discipline one that is neither dogmatic theology seeking to explain the official teachings of a particular christian tradition nor is it a purely historical approach to scripture eschewing questions of the bible s contemporary message and meaning rather biblical theology takes seriously both the need to understand the message of scripture in its particular historical context and the need to address that message to questions that confront contemporary human life

this book is descended from the cadbury lectures delivered in the university of birmingham as long ago as 1968 my early volume old and new in interpretation 1966 remains the basis of the vision now presented the work in its present form is written as a sort of textbook though the book has been expanded to contain much more material than one could cover in a single course of the normal kind the work is a discussion of the whole idea of biblical theology its possibilities and its prospects it is neither a survey nor a history though it includes some elements of both of these if there is any one theme that runs through this work it is the contested character of biblical theology as it has been in this century preface

this monumental work is the first comprehensive biblical theology to appear in many years and is the culmination of brevard child's lifelong commitment to constructing a biblical theology that surmounts objections to the discipline raised over the past generation child's rejects any approaches that overstress either the continuity or discontinuity between the old and new testaments he refuses to follow the common pattern in christian thought of identifying biblical theology with the new testament's interest in the old rather child's maps out an approach that reflects on the whole christian bible with its two very different voices each of which retains continuing integrity and is heard on its own terms

this book demonstrates a number of approaches made by biblical scholars to find a theology of the christian scripture it then considers attempts to bridge the gap between exegesis and dogmatics by appeal to the discipline of fundamental theology and the doctrine of revelation it finds that for all the interesting questions raised one is forced back to the bible from where one must form the themes and concepts which have been developed by theologians through the ages and which with help from biblical historical critics can be made to refresh theology and serve the church this is done by examining the role of faith in the two testaments and by considering how the bible's understanding of that which receives revelation is itself useful for the total enterprise of theology
