a look at the numbers that surround us big and small on earth and in outer space

why write a book about the stars of what use is their study this book covers this ground with a number of anecdotes arising from the author's almost 60 years experience as a research scientist who has worked with some of the largest telescopes in the world the text exposes much of what is glossed over in the canned information that the public get and holds nothing back with respect to uncertainties within the subject people want answers want somehow to be reassured that someone out there has a handle on things this book details the basis for our knowledge of the universe

warts and all and offers important insights as to where the science is going

does one planet really matter among the immensity of the cosmos john gribbin is here to persuade us that it does in this ground breaking and provocative new book gribbin argues that we owe our existence to the impact of a supercomet with venus 600 million years ago but this is only part of the story just one of the astronomical and geophysical reasons why the earth is special for the first time he makes the link between the whole series of cosmic events that have affected the earth and given rise to our intelligent civilization a civilization gribbin argues that is unique within our milky way galaxy even if other earths are common and life itself may be common the kind of intelligent technological civilization that has emerged on earth occurs only here if humankind can survive the present environmental crises the whole of the galaxy may become our home and if not our demise may be an event of literally universal significance

this book explores the concept of polyhedral christianity that has the capacity to embrace the inter multicultural religious complexities of our contemporary world taking inspiration from pope francis use of the image of a polyhedron the author suggests that polyhedral christianity calls for an enspirited leadership this spirit driven leadership is grounded in creational pneumatology and cosmicism to promote resilient religiocultural communities that enjoy a more relational harmony of all life forms on earth conscious of an interdependent interconnected oneness in the sacred web of life in the cosmos creation the chapters engage with indigenous notions of sacred sustainability from the primal as well as the buddhist hindu and islamic religious traditions this innovative corpus will be of particular interest to the scholars of theology teología del pueblo world christianity and interreligious relations
