this book deals with theoretical problems that arise at points of contact between the concerns of philosophers and historians about the practice of historiography in bringing together these critical studies on diverse but related themes the book offers insight into the aims and methods of those working in theory of historiography in recent years especially in english speaking countries

in 2021 mcgill university celebrated its bicentennial anniversary reflecting on contributions to research education and other successes the university s founding within the context of nineteenth century atlantic capitalism requires that a deeper account engage with the more complex and difficult elements of its history mcgill in history brings together diverse historiographies and perspectives to critically examine how mcgill has been implicated in power structures and is the product of conflicting ideologies james mcgill the university s namesake owned and profited from the sale of enslaved black and indigenous people a legacy highlighted by the removal of his statue and ongoing debates over the racially charged redman name used by the men s sports teams imperialism settler colonialism slavery sexism and homophobia are elements of mcgill s story that must be fully integrated into a broader understanding of the university s institutional history challenging siloed narratives with new research the contributors in this volume highlight the important task of scholars to scrutinize and confront history that is unflattering and to rethink their institution s own story a reckoning happening across many institutions of higher education around the world mcgill in history broadens the historical frame of critical university studies

showing how the university can serve as a model for understanding power in modern society

history and philosophy of science and technology is a component of encyclopedia of physical sciences engineering and technology resources in the global encyclopedia of life support systems eolss which is an integrated compendium of twenty one encyclopedias the theme on history and philosophy of science and technology in four volumes covers several topics such as introduction to the philosophy of science the nature and structure of scientific theories natural science a short history of molecular biology the structure of the darwinian argument in the origin of species history of measurement theory episodes of xx century cosmology a historical approach philosophy of economics social sciences historical and philosophical overview of methods and goals introduction to ethics of science and technology the ethics of science and technology the control of nature and the origins of the dichotomy between fact and value science and empires the geo epistemic location of knowledge science and religion scientific knowledge and religious knowledge significant epistemological reference points thing called philosophy of technology transitions from function oriented to effect oriented technologies some thought on the nature of modern technology technical agency and sources of technological pessimism these four volumes are aimed at a broad spectrum of audiences university and college students educators and research personnel

increasingly scholars in the humanities are calling for a reengagement with the natural sciences taking their cues from recent breakthroughs in genetics and the neurosciences advocates of big history are reassessing long held assumptions about the very definition of history its methods and its evidentiary base in scientific history elena aronova maps out historians continuous engagement with the methods tools values and scale of the natural sciences by examining several waves of their experimentation that surged highest at perceived times of trouble from the crisis ridden decades of the early twentieth century to the ruptures of the cold war the book explores the intertwined trajectories of six intellectuals and the larger programs they set in motion henri berr 1863 1954 nikolai bukharin 1888 1938 lucien febvre 1878 1956 nikolai vavilov 1887 1943 julian huxley 1887 1975 and john desmond bernal 1901 1971 though they held different political views spoke different languages and pursued different goals these thinkers are representative of a larger motley crew who joined the techniques approaches and values of science with the writing of history and who created powerful institutions and networks to support their projects in tracing

these submerged stories aronova reveals encounters that profoundly shaped our knowledge of the past reminding us that it is often the forgotten parts of history that are the most revealing

contains it s proceedings
