this addition to the isor series introduces complementarity models in a straightforward and approachable manner and uses them to carry out an in depth analysis of energy markets including formulation issues and solution techniques in a nutshell complementarity models generalize a optimization problems via their karush kuhn tucker conditions b on cooperative games in which each player may be solving a separate but related optimization problem with potentially overall system constraints e g market clearing conditions c conomic and engineering problems that aren t specifically derived from optimization problems e g spatial price equilibria d roblems in which both primal and dual variables prices appear in the original formulation e g the national energy modeling system nems or its precursor pies as such complementarity models are a very general and flexible modeling format a natural question is why concentrate on energy markets for this complementarity approach s it turns out energy or other markets that have game theoretic aspects are best modeled by complementarity problems the reason is that the traditional perfect competition approach no longer applies due to deregulation and restructuring of these markets and thus the corresponding optimization problems may no longer hold also in some instances it is important in the original model formulation to involve both primal variables e g production as well as dual variables e g market prices for

public and private sector energy planning traditional optimization problems can not directly handle this mixing of primal and dual variables but complementarity models can and this makes them all that more effective for decision makers

based on a report by a world bank task force this book provides a candid assessment of the bank s operations in sub saharan africa the book examines how the bank can strengthen its operational response to poverty and improve food security recommends improvements and innovative approaches to poverty reduction and discusses ways of strengthening and making further use of regional initiatives although the report identifies improvements in the work on poverty reduction that have taken place since 1995 it finds that much remains to be done on average 45 to 50 percent of sub saharan africans live below the poverty line a much higher proportion than any other region of the world except south asia the commitment of governments to poverty reduction is usually weak only about 12 african governments have such a commitment economic growth rates are generally far too low to reduce poverty significantly growth rates of 6 5 percent per year are required for countries in this region to reduce poverty at an acceptable rate the world bank s lending has emphasized growth focusing almost 58 percent of its assistance to the region on creating the mechanisms for growth through policy change and large scale investments the world bank s focus on poverty reduction in programming and lending must intensify in all its operational work all development partners should establish stronger collaboration in planning their assistance programs
