the alverno college case is one of seven that form the basis for the arguments and analyses presented in preparing teachers for deeper learning each case outlines the context vision and practices guiding a particular program s enactment and includes sample curricula assessment and feedback forms and the program details that have contributed to its success the cases are valuable reading for educators involved in developing teacher candidates who are self directed collaborative social justice focused and prepared to meet the needs of today s students and a changing society

one of the best books of 2011 from the center for optimal adult development the fields of adult development and the study of learning have traditionally been considered separate with development falling under psychology and learning under education however recent ideas research and practices that have emerged in these fields of study effectively emphasize the inherent reciprocal relationship that exists between them advances in development frequently lead to learning and conversely learning almost necessarily fuels development in this second edition of the oxford handbook of reciprocal adult learning and development the synchronicity between development and learning is explored further as expert authors advance the latest theories to provide a rich foundation for this new area of study and practice for this interrelated field of study at the border of two disciplines this handbook focuses on the capacities of intelligence meta cognition insight self efficacy spirituality interpersonal competence wisdom and other key adult attributes as they relate to positive changes and personal growth in adults contexts for development and learning e g the work role and environment are also addressed and mixed in throughout the volume are emanating implications for research practice and policy what emerges is a thoughtful handbook

for all who promote optimal aging and is a must read for academics psychologists and practitioners in adult development

this book examines the challenges of cross professional comparisons and proposes new forms of performance assessment to be used in professions education it addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of performance assessment for learning to the next level in order to be better equipped to cope with increasing complexity change and diversity in professional education and performance assessment administrators and educators will engage in crucial systems thinking the main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels to answer this question the book identifies unresolved issues and clarifies conceptual elements for performance assessment it reviews the development of constructs that cross disciplines and professions such as critical thinking clinical reasoning and problem solving it discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes finally the book examines what it takes for administrators and educators to develop competence in assessment such as reliably judging student work in relation to criteria from multiple sources the co editors of this volume marcia mentkowski and paul f wimmers are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process lee shulman stanford university

this book examines not only the assessment of student learning but the assessment of institutions the programmes they offer and the teaching they provide it describes in detail the significant developments that have taken place over the last decade in the field and clarifies the different meanings of the term assessment that are now in use

includes section book reviews

a synthesis of nearly 2 000 articles to help make engineers better educators while a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience this publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development the author s first objective is to provide an illustrative review of research and development in engineering education since 1960 his second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership the publication is divided into four main parts part i demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum s internal structure which integrates assessment content teaching and learning part ii focuses on the curriculum itself considering such key issues as content organization trends and change a chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included part iii examines problem solving creativity and design part iv delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork the book ends with a brief insightful forecast of the future of engineering education because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach all readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation

preparing teachers for deeper learning answers an urgent call for teachers who educate children from diverse backgrounds to meet the demands of a changing world in today s knowledge economy teachers must prioritize problem solving ability adaptability critical thinking and the development of interpersonal and collaborative skills over rote memorization and the passive transmission of knowledge authors linda darling hammond and jeannie oakes and their colleagues examine what this means for teacher preparation and showcase the work of programs that are educating for deeper learning equity and social justice guided by the growing knowledge base in the science of learning and development the book examines teacher preparation programs at alverno college bank street college of education high tech high s intern program montclair state university san francisco teacher residency trinity university and university of colorado denver these seven programs share a common understanding of how people learn that shape similar innovative practices with vivid examples of teaching for deeper learning in coursework and classrooms interviews with faculty school partners and novice teachers surveys of teacher candidates and graduates and analyses of curriculum and practices preparing teachers for deeper learning depicts transformative forms of teaching and teacher preparation that honor and expand all students abilities knowledges and experiences and reaffirm the promise of educating for a better world

this valuable resource is the definitive guide to nationally accredited institutions that prepare teachers students embarking on teaching careers need guidance to select the college or university programs that will best prepare them for the complex demands of today s classrooms and students as the profession continues to change dramatically aspiring teachers must meet higher standards from school districts state licensing boards and professional associations many of these standards begin with the national council for accreditation of teacher education ncate only half of the country s teacher preparation programs have met ncate s rigorous standards this guide provides vital information about each of the accredited colleges and universities from tuition size and length of program to descriptions of noteworthy program features including clinical experience opportunities in addition to providing detailed information on the 500 accredited programs across the nation this guide lists the accredited programs that meet especially high standards set by leaders in each teaching field the guide s resource materials make it easy for the student guidance counselor and career advisor to gain up to date information about becoming a teacher today a guide to college programs in teacher preparation is updated every two years
