from the introduction i propose in the following pages to discuss the practice of the short story in english the vagueness of the term short story is apparent no less apparent is the existence in every literature and period of groups of narratives which we can call by no other name the literatures of ancient greece of buddhistic india of medieval france and arabia for each of them readers will bring to mind a well marked well recognized genre which to day we should put under the short story classification the fable the milesian story the birth story of the jatakas the fabliau and conte each name suggests a type of

literary expression employed for very definite purposes as writers or readers named the sonnet the ballade the chanson so they named these varieties of short narrative and felt with more or less reason that in each case man was endeavoring to express his idea of life in a particular and chosen fashion if we feel the vagueness of short story as used in a historical review of our narrative literature it is not because there are no short stories which in the age of their birth were employed in literary work of a special nature we would scarcely think the words vague if nothing definite were to be named by them nor is it because of the impossibility of marking off from long narrative the short narrative which is to be given a name that difficulty is serious only for the rhetorician the fault is rather in the loose meaning of the phrase where short seems to qualify without defining we cannot escape this inconvenience except by creating a new terminology a task far less profitable than the study of a considerable and much neglected literature indeed just what has constituted the short story in english is a question better answered at the end than at the beginning of such an investigation nevertheless it is evident without further discussion that the writers who in many tongues and times have used a short narrative to convey their ideas are in one respect very often alike no matter what their subject matter may be morality indecency high imagination or human nature they have wished to procure a certain effect which could best be gained by a short story they have wished to turn a moral as in a fable or to bring home in a fabliau an amusing reflection upon life or to depict a situation as in the typical short story of to day and in every case a brief narrative with its one unified impression best served them it is the short narrative used for life units where only brevity and the consequent unified impression would serve that becomes the short story is this definition sufficient only a study of a given literature will show if it will work as the pragmatists say it is sufficient but in so working it is neither requisite nor possible that hard and fast lines of division should result where to place many whitish yellow and yellowish white peoples is a problem for anthropologists yet we call the very black man negro without hesitation certain limitations however must be imposed at the outset plots circulating through every tongue are often independent of strictly literary or cultural movements we however must concern ourselves primarily with written literature it is the history and development of an art which we follow an art by means of which all manner of familiar experiences can be put into form and made marketable plots circulate in all ways their history is matter for folk lore and psychology it is the short story as it appears in recorded english literature and the growth of its usefulness therein which is the subject of this volume
