terry returned from saudi arabia in the may of 1978 after a year in the kingdom with a spring in his step and over flowing with enthusiasm feeling that he could secure a job using the experience he had gained during his time in operations engineering in the eastern province of saudi having cut his teeth in a demanding environment and coming out the

other end full of ambition to move on in the petroleum industry and how soon he was to discover it was not to be as easy as he first thought experiencing an educational system of the 50 s and the inadequacies of that system made terry realise at an early age that things don t come simple and if you really want something then you had better be prepared to work hard to get it coming back from saudi arabia after soaking up so much experience in the petroleum industry he expected to walk into employment without any problems when that was not the case it was like another wakeup call and reasserted what terry had previously experienced that nothing comes without an inner drive from yourself to make it happen originally his wife and himself had agreed that he would work in saudi arabia for two years but at the end of the first year and in the fifth week of his six weeks leave period after which terry was supposed to return they realised that neither relished the idea of being apart from each other and terry being away from his family for another year he was only too willing to agree that he needed to seek work nearer home and so the search began in july 1978 after many interviews and rejected contracts he finally found his dream job in the north sea petroleum industry and his career takes off with an engineering construction company he remained with for over thirty years the book tells of the projects and people he was engaged with including many adventures and events that transpired over the span of his career

a history of the american steel barge company and the vessels that it built and operated the whaleback ship reflected the experiences of its inventor captain alexander mcdougall who decided in the 1880s that he could build an improved and easily towed barge cheaply by using the relatively unskilled labor force available in his adopted hometown of duluth minnesota captain mcdougall s dream resulted in the creation of the american steel barge company from 1888 to 1898 the american steel barge company built and operated a fleet of forty four barges and steamships on the great lakes and in international trade these new ships were considered revolutionary by some and nautical curiosities by others built from what was then a high tech material steel and powered by state of the art steam machinery their creation in the remote north was a sign of industrial accomplishment in whaleback ships and the american steel barge company roger c pellett explains that the construction of these ships and the industrial infrastructure required to build them was financed by a syndicate that included some of the major players active in the golden age of american capitalism the american steel barge company operated profitably from 1889 through 1892 each year adding new vessels to its growing fleet by 1893 it had run out of cash the cash crisis worsened with the onset of the panic of 1893 which plunged the country into a depression that mostly halted the ship building industry only one shareholder john d

rockefeller was willing and able to invest in the company to keep it afloat and by doing so he gained control when prosperity returned in 1896 the interest in huge iron ore deposits on the mesabe range required larger more efficient vessels in an attempt to meet this need the company built another vessel that incorporated many whaleback features but included a conventional great lakes steamship bow although this new steamship compared favorably with vessels of conventional design it was the last vessel of whaleback design to be built whaleback ships and the american steel barge company objectively examines the design of these ships using the original design drawings notes the successes and failures of the company s business strategy and highlights the men at the operating level that attempted to make this strategy work readers interested in the maritime history of the great lakes and the industries that developed around them will find this book fascinating
