the paper shows how a question answering system can use first order logic as its language and an automatic theorem prover based upon the resolution inference principle as its deductive mechanism the resolution proof procedure is extended to a constructive proof procedure an answer construction algorithm is given whereby the system is able not only to produce yes or no answers but also to find or construct an object satisfying a specified condition a working computer program qa3 based on these ideas is described methods are presented for solving state transformation problems in addition to question answering the program can do automatic programming control and problem solving for a simple robot pattern recognition and puzzles author

a collection of essays from distinguished contributors looking at why it is that mathematical proof is

given precedence over other forms of mathematical justification

this book constitutes the refereed proceedings of the 14th international conference on logic for programming artificial intelligence and reasoning lpar 2007 held in yerevan armenia it contains 36 revised full papers 15 short papers and three invited talks that were carefully selected from 78 submissions the papers address all current issues in logic programming logic based program manipulation formal method automated reasoning and various kinds of ai logics
