the semantic is an idea of world wide inventor tim berners lee that the as a whole can be made more intelligent and perhaps even intuitive about how to serve a users needs although search engines index much of the s content they have little ability to select the pages that a user really wants or needs berners lee foresees a number of ways in which developers and authors singly or in collaborations can use self descriptions and other techniques so that the context understanding programs can selectively find what users want the semantic crafting infrastructure for agency presents a more holistic view of the current state of development and deployment this a comprehensive reference to the rapidly developing technologies which are enabling more intelligent and automated transactions over the internet and a visionary overview of the implications of deploying such a layer of infrastructure a through examination of the semantic including the following topics web information management languages and protocols application and tools and collaboration and agency a unique volume of practical information in depth analysis conceptual overviews and contextual material from professionals in the field features appendices of technical terms and glossary semantic resources intellectual property issues and lists of elements this is essential reading for engineers web developers and industry professionals wishing to enhance their knowledge of recent developments management staff lecturers postgraduate and undergraduate students will also find this book appealing

these are exciting times for philosophical theorizing about propositions with the last 15 years seeing the development of new approaches and the emergence of new theorists propositions have been invoked to explain thought and cognition the nature and attribution of mental states language and communication and in philosophical treatments of truth necessity and possibility according to frege and russell and their followers propositions are structured mind and language independent abstract objects which have essential and intrinsic truth conditions some recent theorizing doubts whether propositions really exist and if they do asks how we can grasp entertain and know them but most of the doubt concerns whether the abstract approach to propositions can really explain them are propositions really structured and if so where does their structure come from how does this structure form a unity and does it need to are the representational and structural properties of propositions really independent of those of thinking and language what does it mean to say that an object occurs in or is a constituent of a proposition the volume takes up these and other questions both as they apply to the abstract object approach and also to the more recently developed approaches while the volume as a whole does not definitively and unequivocally reject the abstract objection approach for the most part the papers explore new critical and constructive directions this book was originally published as a special issue of the canadian journal of philosophy
