 man portable flamethrower this formidable weapon first saw battlefield use in the hands of german
 troops during world war i and went on to arm the forces of many countries in world war ii and

causing the occupants to suffocate it projected a stream of flammable liquid which could be bounced off the interior surfaces of tunnels buildings and other defended structures to reach deep inside a fortification from its combat debut to its deployment in vietnam chechnya and elsewhere the flamethrower has proven to be devastatingly effective not least because of its huge psychological impact on enemy troops yet despite this the weapon and its operators have always been vulnerable suffering from a very particular set of limitations all of which are explored here featuring expert analysis first hand accounts and a startling array of illustrations and photographs this is the definitive guide to an extraordinary chapter in the history of military technology
