a study of the reception history of thomas aquinas s account of eucharistic sacrifice during the sixteenth and early seventeenth centuries

this book is focused on the reception history of thomas aquinas account of eucharistic sacrifice during the sixteenth and early seventeenth centuries although the sacrificial character of the eucharist has been of interest to theologians throughout the church s history during the early sixteenth century renewed attention was given to this subject in part because of disputes that arose between reformed and catholic theologians about the relationship between the eucharistic liturgy and christ s sacrifice on the cross does the eucharistic presence itself have a sacrificial quality can aspects of the liturgy or dimensions of the moral life be considered a sacrifice and if so in what way the emergence of these and other new questions in eucharistic theology at the beginning of the sixteenth century coincided with a shift within the practice of theology in universities that began to emphasize aquinas *summa theologiae* as the standard text of theological instruction in place of peter lombard s *sentences* because of the *summa* s relatively late ascendency as a text of commentary and instruction studying the *summa* s reception history involves the interpreter in a complex textuality although itself a product of the middle ages as a received text the *summa* is in many ways a creature of the early modern period interpreting the reception of this text therefore requires one to consider not only the *summa* in its original environment but the life of this same text as it was received in new interpretive contexts

what if heresy had grown within the church maturing secretly over more than a millennium working ill under the cover of right belief and worship this startling and provocative book argues that the ancient heresy of docetism reappearing in a form resonant with its original denial of christ s body has brought the western

church to its current state of disrepair docetism has irreparably fractured western christendom reducing the church to a tangled mass of denominations and sects while also infecting the course of western society beyond the ecclesia progressing from an ontological foundation oriented toward the dissolution of form docetism has led peoples convinced of their march toward unity into ever deepening alienation although it has repercussions for theological anthropology this ontological foundation has its profoundest implications for the doctrine of god the solution to docetism as proposed by the author begins with a theory of the trinity grounded in the tenets of biblical wisdom and explicated in terms of the relations of origin between the divine persons

in physicalist soteriology in hilary of poitiers ellen scully presents hilary as a representative of the mystical or physical trajectory of patristic soteriology most often associated with the greek fathers scully shows that hilary s physicalism is unique both in its latin non platonic provenance and its conceptual foundation namely that the incarnation has salvific effects for all humanity because christ s body contains every human individual hilary s soteriological conviction that all humans are present in christ s body has theological ramifications that expand beyond soteriology to include christology eschatology ecclesiology and trinitarian theology in detailing these ramifications scully illuminates the pervasive centrality of physicalism in hilary s theology while correcting standard soteriological presentations of physicalism as an exclusively greek phenomenon
