this book systematically explores the moral issues surrounding self deception while many articles and books have been written on the concept of self deception in recent years martin s gives much greater emphasis to self deception as a significant topic for both ethical theory and applied ethics self deception is perplexing from a moral point of view it seems tailor made to camouflage and foster immorality does all self deception involve some guilt and is it among the most abhorrent evils as some moralists and theologians have charged or is it only wrong sometimes such as when it has bad consequences could it on occasion be permissible or even desirable to deceive ourselves just as we are sometimes justified in deceiving other people are self deceivers perhaps more like innocent victims than perpetrators of deceit and as such deserving of compassion and help or paradoxically are they best viewed with ambivalence culpable as deceivers and simultaneously innocent as victims of

deception from the introduction martin develops a conception of self deception as the purposeful evasion of acknowledging to oneself truths or one's view of truth he details a systematic framework for understanding the main moral perspectives and traditions concerning self deception that have emerged in western philosophy in so doing he clarifies related concepts like sincerity authenticity honesty hypocrisy weakness of will and self understanding ranging across traditions both philosophical kant kierkegaard and sartre and non philosophical freud eugene o neill and henrik ibsen martin shows why self deception is as morally complex as any other major form of behavior the appeal of this book is broad the volume will challenge professional philosophers and psychologists yet it is organized and written to be accessible to students in courses on ethics philosophy of mind and philosophy of literature martin's numerous literary examples should also interest literary critics
