Le Corbusier 1887-1965 was the most significant architect of the twentieth century. Every architecture student examines the Swiss master's work, yet all too frequently they rely on reproductions of faded drawings of uneven size and quality. 'Le Corbusier Redrawn' presents the only collection of consistently rendered original drawings at 1:200 scale of all twenty-six of Le Corbusier's residential works, using the original drawings from the Le Corbusier Foundation's digital archives. Architect Steven Park has beautifully redrawn 130 perspectival sections as well as plans, sections and elevations of exterior forms and interior spaces. These remarkable new drawings, which combine the conceptual clarity of the section with the spatial qualities of the perspective, not only provide information about the buildings, they also help students experience specific works spatially as they learn to critically examine Le Corbusier's works.

through the process of redrawing the plans of a wide range of completed projects by le corbusier this book offers a new interpretation of his architectural works redrawing all the technical drawings provides an insight into the thoughts of the architect when dealing with different building types with different functions and provides a fresh understanding of the morphological strategies containing 11 different types of public buildings completed by le corbusier this book draws on 80 of his works and includes drawings and 3d model spatial diagrams when examined in the context of completion date the reader is able to observe the continuity and transition of le corbusier s design ideas by focusing on le corbusier and his influential architecture the book provides a better understanding of the morphological basis of modernist architecture in the 20th century 00yu fei specialised in le corbusier s designs during his studies at peking university over the course of three years yu fei methodically researched and analysed the work of more than 80 public global architecture projects he is currently studying for his phd in architecture at waseda university in japan

in 1929 eileen gray designed villa e 1027 for herself and her youthful partner jean badovici but only lived there for three years today the elegant house in roquebrune cap mar tin in southern france is an icon of modernism in 1937 le corbusier discovered the place and the maison en bord de mer inspired by the genius of the place and the light on the côte d azur he created a total of eight large format wall paintings there in 1938 and 1939 onwards some of which complement the building congenially while others set counterpoints in 1952 he built his cabanon nearby and decorated it with murals as well the book by the well known architectural historian tim benton documents le corbusier s artwork at this special place explores its controversies and places it in his overall oeuvre the fascinating photographs by manuel bougot capture the special atmosphere of the villa le corbusier s painting is lesser known but was formative for his lifelong preoccupation with polychromy after extensive renovation work until 2021 e 1027 as well as the cabanon is open to the public again

the millowners association building in ahmedabad designed by le corbusier and completed in 1954 has rarely been published but is nevertheless considered an important milestone in the architect s work in particular the building influenced his later work such as the carpenter center for the visual arts at harvard this book documents the building and relates it to le corbusier s theoretical work especially vers une architecture the significance of key figures such as paul valéry and john ruskin for le corbusier s work is explained characteristic design elements such as the promenade architecturale and the use of brise soleils are explored in addition to numerous scaled drawings newly produced models clarify the most important design aspects of the building le corbusier s 1954 building for the millowners association in ahmedabad is an understudied key work with attractive photographs new drawings and models created especially for the publication the structure exemplifies characteristic elements of le corbusier s work and his development as an architect

the book investigates the theme of modernism 1920 1960 and its epigones as an integral part of tangible and intangible cultural

heritage which contains the result of a whole range of disciplines whose aim is to identify, document and preserve the memory of the past and the value of the future including several chapters it contains research results relating to cultural heritage more specifically modernism and current digital technologies this makes it possible to record and evaluate the changes that both undergo the first one from a material point of view the second one from the research point of view which integrates the traditional approach with an innovative one the purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth moving through different fields of cultural heritage from different forms of art to architecture from design to engineering from literature to history representation and restoration the book appeals to scholars and professionals who are involved in the process of understanding, reading and comprehension the transformation that the places have undergone within the period under examination it will certainly foster the international exchange of knowledge that characterized modernism

the architect reconstructing her practice examines how the introduction of women to the main body of architecture might bring about a reconstruction of the orders that pervade architectural production and consumption at a moment when the architectural profession is beginning to shift from its traditionally male domination the architect reconstructing her practice examines how the introduction of women to the main body of architecture might bring about a reconstruction of the orders that pervade architectural production and consumption in a collection of autobiographical essays in which practice is both the site and the vehicle for change twelve american and european architects reflect on the nature of critical practice and its relation to architecture the contributors were chosen not only for the distinguished quality of their work but also for the range of architectural practices they collectively encompass from the intersection of theory and philosophy to the intersection of building process and industry together they present a compelling and provocative critique of architectural culture all show a willingness to transgress the various mediums and territories of architecture to recover and reopen certain discussions lost in the architectural discourse they have inherited

architecturally speaking is an international collection of essays by leading architects artists and theorists of locality and space together these essays build to reflect not only what it might mean to speak architecturally but also the innate relations between the artist's and architect's work how they are distinct and in inspiring ways how they might relate through questions of built form this book will appeal to urbanists geographers artists architects cultural historians and theorists

fractal analysis is a method for measuring, analysing and comparing the formal or geometric properties of complex objects in this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century's most respected and celebrated architects including designs by le corbusier eileen gray frank lloyd wright robert venturi frank gehry peter eisenman richard meier and kazuyo sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world's most famous designs starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of

famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field the data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture through this process the book offers a unique mathematical insight into the history and theory of design

the new eco architecture builds a historical bridge between architectural science and design it seeks to address neglected aspects of the modern movement as a prelude to supporting a diversity of architectural insight and experimentation aimed at twenty first century environmental needs and priorities the attitudes and influences of renowned figures are re examined in relation to current issues of architectural sustainability by setting today s green architectural quest within a twentieth century context and evaluating the main protagonists with regard to a modern eco sensitive lineage the book will be of primary interest to architectural students academics and practitioners however it should also intrigue historians theoreticians and critics who tend to gloss over such issues as well as other disciplines engaged with the built environment

charles edouard jeanneret set about the task of reinventing everything he had touched from himself to architecture famously he began with his own name his resonant pseudonym le corbusier meant crow like and he spent most of his career observing the wide horizon of worldwide developments

charles Édouard Jeanneret known as le corbusier 1887 1965 influenced the design function and construction of office and residential buildings as well as twentieth century art and design however there has not yet been an extensive precise examination of his role as an artist for more than five decades le corbusier oscillated between contradictory poles his dedication to mechanical objects on the one hand and his search for poetic form on the other the mutual inspiration stemming from aesthetic versus creative took place in his secret laboratory the artist s studio this is the first publication to consolidate all of the facets of his oeuvre and it arrives at new approaches toward understanding his paintings drawings sculptures tapestries furniture architectural sketches and plans as well as his books and photographs the book s five chapters cover a wide spectrum ranging from the purist paintings and early villas to le corbusier s reinterpretation of values and his late works exhibition schedule moderna museet stockholm january 19 april 18 2013

this book brings together 24 provocative texts that collectively express the power and diversity of women s views on architecture today this volume presents a dialogue among women historians practitioners theorists and others concerned with critical issues in architecture and urbanism
