tandis que les crises qui secouent l'empire deviennent de plus en plus violentes et annoncent son effondrement la fondation créée par le psychohistorien Hari Seldon prospère suscitant du

même coup des visées annexionnistes en tout premier lieu celles de bel riose jeune général qui voit dans les secrets détenus par la fondation le moyen de se pousser sur le trône mais voilà qu'intervient un mystérieux conquérant aux pouvoirs paranormaux surnommé le Mulet

L'univers uni c'est fini l'empire galactique se désagrège trente mille ans de chaos sont au programme et moi j'en ai trop fait et je suis las oui je m'appelle Hari Seldon et je vois que ce nom vous dit quelque chose tout ce que j'ai fait c'est de poser les équations et d'agir je continue à venir ici dans mon bureau je crois parfois y entendre des voix celles de mes parents de mes étudiants de mes collègues mais les couloirs sont vides la fondation est faite et le bâtiment de psychohistoire ne sert plus à rien la suite se passe ailleurs

analyse roman de science fiction

Hari Seldon n'avait qu'un souhait rester mathématicien s'absorber dans la froide précision des nombres mais le destin va le propulser malgré lui au poste de premier ministre de l'empire au début de l'aventure Hari est sur le point de quitter son poste de chercheur et de relever le défi presque impossible de gouverner vingt-cinq millions de mondes habités depuis la planète Trantor avec l'aide de sa compagne le robot humanoïde Dors et de son protégé Yugo Seldon s'efforce de mettre au point la psychohistoire cette science qui prédira l'avenir sans jamais imaginer qu'elle lui vaudra d'affronter la menace la plus terrifiante de l'histoire du futur

auteur phare de la science fiction Isaac Asimov 1920-1992 a offert au genre certains de ses plus beaux chefs d'œuvre et notamment Fondation et Les Robots dans ces deux cycles il développe une idée très forte sur l'utopie en se demandant sans cesse si elle est possible et de quelle manière l'atteindre avec cette étude Anthony Vallat

conçue par le psychohistorien Hari Seldon pour restreindre l'ère de chaos résultant de la décadence de l'empire galactique la fondation est désormais aux mains du Mulet un mutant

imprévisible capable de manipuler les esprits et d'imposer sa volonté à quiconque avec ses pouvoirs et les immenses ressources que lui procure la fondation il s'est donné pour objectif d'étendre sa domination aux ultimes vestiges de l'empire défunt mais déjà une nouvelle légende prend forme il existerait une seconde fondation consacrée aux sciences mentales œuvrant de façon occulte pour garantir l'accomplissement des desseins du légendaire Hari Seldon le cycle de Fondation a obtenu en 1966 un prix Hugo spécial le consacrant meilleure série de tous les temps

prévoyant l'effondrement prochain de l'empire galactique le psychohistorien Hari Seldon a jadis créé deux fondations l'une officielle l'autre occulte afin de préserver la civilisation d'une interminable période de chaos pourtant cinq siècles après leur établissement alors même que la première fondation n'a jamais été aussi puissante un nouveau protagoniste semble entrer en jeu œuvrant dans l'ombre à l'insu de tous peut-être tient-il entre ses mains le devenir de l'humanité tout entière

for a long period soil mechanics has remained at the semi-empirical stage and only a few

decades ago it has shown a tendency to become a fundamental science however this evolution is taking place slowly in spite of the efforts of numerous research scientists the very complex rheological laws of soils are still not well known even if these laws were elucidated it would take a long time still to deduce simple rules from them for reliable and convenient use in current practical engineering in the pursuit of these distant aims and of others more immediate fundamental research and applied research are very active both in rheology and soil mechanics the complexity of the problems to be solved should incite the laboratory researchers and the engineers to a continuous collaboration everyone acknowledges the advantage of these connections although aware of the difficulty of realizing this wish however contacts are being made little by little between the representatives of the different branches of rheology and soil mechanics to the great benefit of science the bureau of the international union of theoretical and applied mechanics iutam aware of the importance of these two associated fields of mechanics considered it possible to accelerate the natural and necessary process of their interpenetration by organizing in grenoble from 1st to 8th april 1964 an international symposium on rheology and soil mechanics

presents an overview of the history of the robot culled from interviews with experts such as scientists surgeons manufactures science fiction writers artists filmmakers and provides information on the role they play in daily life and speculates on their future
