annotation the two monumental volumes making up this collection of essays hold the names of the world's most renowned and respected scholars in the field of semiotics and does more than full justice to the extraordinary career of algirdas julien greimas before this mer à boire of some seventy five essays kicks off the editors present a state of the art introduction which is followed by a unique bio bibliography of a j greimas that trails the career of the master writer in unparalleled fashion through the years

whereas for the wider public jan patocka is known mainly as a defender of human rights and one of the first spokespersons of charter 77 who died in prague several days after long interrogations by secret police of the communist regime the international philosophical community sees in him an important and inspiring thinker who in an original way elaborated the great impulses of european thought mainly husserl's phenomenology and heidegger's philosophy of existence patocka also reflected on history and the future of humanity in a globalized world and laid the foundations of an original philosophy of history his work is a subject of lively philosophical discussion especially in french and german speaking countries and recently also in spanish speaking in u s a and in the far east scholars from around the world who are interested in the philosophy of jan patocka gathered in prague to commemorate his centenary and the thirtieth anniversary of his death the conference explored the significance of his work and its continuing influence on contemporary philosophy the volume presents selected papers from the conference in english language

jan patocka perhaps more so than any other philosopher in the twentieth century managed to combine intense philosophical insight with a farsighted analysis of the idea and challenges facing europe as a historical cultural and political signifier as a political dissident in communist czechoslovakia he also became a moral and political inspiration to a generation of czechs including václav havel he accomplished this in a time of intense political repression when not even the hint of a unified europe seemed visible by showing in exemplary fashion how concrete thought can be without renouncing in any way its depth europe as an idea and a political project is a central issue in contemporary political theory patocka's political thought offers many original insights into questions surrounding the european project here for the first time a group of leading scholars from different disciplines gathers together to discuss the specific political impact of patocka's philosophy and its lasting significance

the risk of freedom presents an in depth analysis of the philosophy of jan patocka one of the most influential central european thinkers of the twentieth century examining both the phenomenological and ethical political aspects of his work in particular francesco tava takes an original approach to the problem of freedom which represents a recurring theme in patocka's

work both in his early and later writings freedom is conceived of as a difficult and dangerous experience in his deep analysis of this particular problem. Tava identifies the authentic ethical content of Patocka's work and clarifies its connections with phenomenology, history of philosophy, politics and dissidence. The risk of freedom retraces Patocka's philosophical journey and elucidates its more problematic and less evident traits such as his original ethical conception, his political ideals and his direct commitment as a dissident.
