pierce and newstrom's *Leaders and the Leadership Process* 4e is a collection of readings, self-assessments, case studies, and experiential exercises on leadership intended to give students a feel for the breadth and richness of this study. This paperback book provides students with a sense of the complexity associated with leadership in organizations as well as an understanding of the pieces that serve to define leadership. The text encourages students to engage in dialogue and to think critically about the leaders and the leadership process. Self-assessments, which begin most chapters of the book, encourage students to look at their own personal leadership style. A capstone section of applications in the form of case studies and experiential exercises asks students to move beyond theory to the practice of leadership. The authors use this combination of readings, self-assessments, and applications to create a leadership mosaic, one that encourages students to examine the concepts, propositions, perspectives, and theories one at a time as it builds towards the students' ultimate, unique leadership mosaic.

If you are a leader or aspire to leadership over others, you must read *Leaders Power Consequences*. It clearly exposes the influences a leader has with people who are close and important to the leader. The leader is the person who holds the true power; that is, the buck stops with them. It is not underlings who act on behalf of another who dictates their actions; they are not the true power, and no one is long deceived. Where do problems in relationships, trivial or significant, not exist? The answer to resolving the problem is likely found where the power is located. Who are the true leaders? What are their expectations, and how well do they communicate with those they lead, and how well and candidly do those significant to the leader communicate directly back to the leader? This is where trust, safety, and respect play a huge role in how the relationship plays out and either grows mutually or is destructive mutually. Most leaders tend to communicate badly, have unspoken or inflexible expectations towards those they lead, and blame others for what is the leader's failings. *Leaders Power Consequences* confronts this problem of leadership directly and clearly by using Sy Ogulnick's personally experienced stories. He clearly describes the path leaders must take if they are to personally grow, to understand themselves better, and in the process, to contribute to the growth of those they lead. When authentic communication takes place between those in power and those immediately at the effect of this power, trust, safety, and respect are felt by each. This must be found in the environment, or genuine dialogue between them is impossible and will not even at the point of a gun take place, and it is the leaders who are primarily responsible for the creation of the environment. Words do not make it so, but action

behavior of the leaders does the path laid out in leaders power consequences leads to facilitating problem solving creativity innovation and a sense of mutual ownership amongst people to the degree that most leaders can only dream of
