first published in 1998 routledge is an imprint of taylor francis an informa company

despite the abundant literature about development policies and solutions many developing countries continue to struggle with basic development issues the author of this book argues that such a situation is due to the absence of an unlearning process that would aid in adjusting negative mindsets and outdated mental models that hinder economic development this book addresses development issues from the behavioral perspective linking negative mindsets and behaviors to growth and development strategies and policies it identifies six mindsets and actions that impede the economic development of underdeveloped nations then it suggests solutions to upgrade the mindsets according to the plans and policies moreover the book highlights the different concepts and phenomena in a straightforward way with simple figures to facilitate their understanding for people who do not necessarily have a background in business or economics at the same time it fully respects scientific standards in addressing the topics and themes under discussion each

chapter identifies the state of mind needed to unlearn with real examples and experiences and offers suggestions to undertake and accomplish the unlearning process based on real and clear cut examples the book presents the main beliefs and psychological mechanisms that lead to underperforming behaviors of customers investors entrepreneurs and policy makers thus the main audience for the book is scholars students and researchers in economics and development as well as policymakers wishing to attempt new approaches to counteract the boomerang effect

the fourth edition of the process of economic development offers a thorough and up to date treatment of development economics this landmark text will continue to be an invaluable resource for students teachers and researchers in the fields of development economics and development studies the new edition has been revised and updated throughout reflecting the most recent developments in research and incorporating the latest empirical data as well as key theoretical advances the period since the publication of the third edition of the process of economic development has been a time of immense change in the developing world the period has seen huge economic growth in china economic restructuring in india and the continuing impact of environmental issues such as climate change the fourth edition reflects these developments as well as including numerous case studies and new material on the following transnational corporations and labor in export processing zones industrial policy and structural change gender inequality income distribution and development progress towards the millennium development goals technology and national innovation systems aid and the least developed nations the post debt crisis era and debt relief for africa cypher s comprehensive account remains the development economics text par excellence as it takes a much more practical hands on view of the issues facing developing countries than other overly mathematical texts this book is unique in its scope and in the detailed attention it gives to the historical contexts that have influenced progress toward development it is accessibly written both for students of economics and for those with an interest in the many aspects of development studies

comparison of political factors in economic growth and the role of these factors at a certain stage of economic development in france taiwan china japan and uk from the 17th to the 19th centuries including the phase of industrialization in appendix an assessment of the ussr economic development from 1930 to 1964 bibliography pp 383 to 406 and references at the end of each chapter historical

an invaluable survey of the literature on growth colin white argues persuasively and

expertly that any attempt to solve the profound mystery of economic growth at the large scales of world history must move beyond the limited vision of neo classical economic theory and incorporate the narrative methods and perspectives of history as well this is a superb overview and critique of contemporary attempts to explain economic growth and a perceptive re examination of the whole issue of growth in human history david christian macquarie university australia colin white transcends a number of false dichotomies in this work he shows that we need both theory and history in order to comprehend the transition to modern economic growth he appreciates that this transition was neither inevitable as many theorists argue nor entirely contingent as historical treatments often suggest he argues that advice to present day less developed countries should combine a general understanding of the process of transition with detailed analysis of the history and conditions of the country in question he appreciates that it makes sense to speak of an industrial revolution while also recognizing that this was a gradual process that in turn built upon even more gradual changes in earlier centuries in the british economy less obviously but importantly he realizes that we can best understand economic growth if we recognize the limitations of each scholarly approach in order to integrate the best of these rick szostak university of alberta canada this fascinating book considers one of the most important problems in economics the inception of modern economic development there is at present no satisfactory explanation of the inception of modern economic development an excessive focus on either pure theory or on unique histories limits the explanatory power this book realises the need to integrate the two approaches moving beyond the proximate causes of economic theory to review the role in an analytic narrative of significant ultimate causes geography risk environments human capital and institutions colin white distils the conclusions of a vast literature drawing from economics economic history and business and management exploring economic theory demonstrating limitations and highlighting alternative approaches particular attention is paid to the appropriate role of innovative entrepreneurs and of government and three case studies illustrate how to build an analytic narrative showing how far we can generalise about the determinants of economic development and in particular how to understand the specific determinants in individual countries this book will prove a stimulating and thought provoking read to academics students and researchers with an interest in economics and economic development

economic development is but one facet of human development this forces us to ask how do humans develop man is a social animal and the growth of our humanity

requires various social institutions such as bureaucracy the paradox of capitalism is that it is a system ostensibly based on self interest yet wholly dependent on non market values for its success these non market values are shaped by two much neglected factors religion and ethnicity economic development is an applied field whatever it claims as a conclusion should be an applicable conclusion this requires attention to all those non economic factors which translate economic decisions into practice such as the forces of nationalism versus the pressures of such global powers as us foreign policy and the advice of the imf ibrd since policy is our goal theory whose intellectual basis is inaccessible to policy makers or which fails to have application should be minimized mathematical models are best avoided and if they are to be used the burden of proof must be placed upon their proponents as insights about the market are limited neither by time nor space poor countries can learn from rich ones and vice versa it is most fruitful to focus on examples of success such as the east asian economies they are the clearest illustration of the fact that rapid economic development is possible even to those who have suffered through imperialism and possess few natural resources but have their work and their determination intact one good example is enough

adopting a structuralist approach this informative book discusses the international obstacles to economic growth and the role of individual sectors including manufacturing and services in political economies it also examines key issues such as the determinants of economic growth through capital accumulation and technological change leading experts shed light on the importance of aggregate demand in relation to trade and capital flows addressing socio economic inequality and regional divergence focussing on latin american countries they showcase regional disparities and demonstrate the historical regimes that have perpetuated income inequalities covering key case studies such as the social polarization in colombia and the challenges for inclusive growth in argentina they reveal the institutions policies and economic agents involved in the development of mexico s political economy the book further demonstrates that there is much more to economic development than neoliberal reforms identifying the roles of inflation and fiscal expansion alongside contemporary obstacles to economic growth a vital resource for students and academics in economics public policy and human and development geography this book will also greatly benefit researchers and policymakers in economic development and politics
