Examines particular management accounting practices and specific organizational contexts. Adopts a global perspective of management accounting practice. Award winner of the management accounting section of the American Accounting Association notable contribution to management accounting literature award.

Since its introduction by Kaplan and Norton in 1992, the balanced scorecard (BSC) has gradually been adopted as a fundamental system of management by many organizations. Because the BSC is mainly designed for large companies in developed countries, there is a question of its successful application in small and medium-sized enterprises (SMEs), especially those in developing countries, as there is little research in this area. This book is designed to fill that gap. In this book, Vietnamese SMEs are used as the central study cases for the application of BSC. Such a system enables SMEs to meet their management needs more quickly. Lessons learned in this study can be extended not only to other Vietnamese SMEs but also to firms in other countries with similar economic conditions. The book will also provide an improved understanding on factors influencing the adopting process.
