whether you're looking to create your first interactive report or refine complex data models for your business, Power BI Simplified is your go-to resource for transforming your data into valuable insights. Get ready to unlock the full potential of Power BI and take your data analysis skills to the next level.

Using Power BI, you can combine your data sources, create stunning visualizations, and embed your story on your website within seconds. The goal of this course is to teach you how to use raw data, monitor it, and visualize it in a form that will provide rich insights with the help of dashboards. You will start with a set of business requirements for an example project from a client. Initially, you will connect to a data file, you'll run through the process of connecting to your data, transform it, and then build the data model. This will help you understand and determine which DAX calculations are needed to meet the business requirements. Finally, you will build out an interactive and functional report and a detailed dashboard and publish them on PowerBI.com. When it comes to learning Power BI, this course will ensure that you have the necessary tricks of the trade for effective insights and simplified visual analytics. [Resource description page](#)

Why Power BI in a world of data? Business intelligence and business analytics are in high demand. Companies are constantly searching for ways to make better and faster and smarter decisions. This heavily involves getting insights from their data. Whether you're a small company or a multinational, data-driven decision making is the key to success for any business in the world of tomorrow. Because of that, companies are drastically looking out for skilled employees and freelancers worldwide with the necessary capabilities to help them analyze and understand their data. It is a war for talent. This offers tremendous job opportunities for all who are interested in the topic and want to dive into it. Microsoft Power BI is an advanced yet easy-to-get-started self-service business analytics business intelligence solution provided by Microsoft, which is currently in very hot demand. Gartner has labeled Power BI as a leader in their BI quadrant and considers Power BI visionary. The author's experience is that companies will more and more replace old PowerPoint and standard Excel with Power BI. We are already in the process towards this data-driven future. That is why Daniel created this new Power BI Masterclass. Your future in data analytics course. The main goal is to help you to further increase your skills from his other Power BI Masterclass.
