pandemics massive earthquakes war and other catastrophes inspire immediate action because their casualties and destruction are immediately visible climate change is an unyielding problem because its long range dangers are hidden and thus it is a global risk unlike anything in human experience the federal government recently announced aggressive climate targets for canada we have committed to producing net zero greenhouse gas emissions by 2050 which will require major changes for our economy and way of life canadian citizens need to understand why our most distinguished climate scientists and our senior political leaders think that we must meet this target canada and climate change explains the importance of policies that will ensure we meet the net zero emissions target william leiss provides a firm grasp on what climate change is and how scientists have described shifts in the earth s climate as they have occurred over hundreds of millions of years and as they are likely to occur in the near future especially by the end of this century leiss argues that citizens have a right to place their trust in what climate scientists tell us canada and climate change is an essential primer on where we stand on the issue of climate change in canada and what will unfold in the years ahead

hardly a day goes by without news of the extinction or endangerment of yet another animal species followed by urgent but largely unheeded calls for action an

eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation marks the subjugation of Canadian wildlife. Argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies. Tracing the evolution of the highly contestable assumptions that define the human-wildlife relationship, Foran stresses the price wild animals pay for human self-interest. Using several examples of government oversight at the federal, provincial, and territorial levels, from the Species at Risk Act to the Biodiversity Strategy Protected Areas Network and provincial management plans, this volume shows that wildlife policies are as much or more about human needs, priorities, and profit as they are about preservation. Challenging established concepts including ecological integrity, adaptive management, sport hunting as conservation, and the flawed belief that wildlife is a renewable resource, the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems. A passionate critique of contemporary wildlife policy, the subjugation of Canadian wildlife calls for belief change as the best hope for an ecologically healthy wildlife-rich Canada.

Featuring insights from some of the top specialists in the country, *Fiscal Federalism in Canada* unpacks numerous complexities of fiscal federalism in Canada. The book features key regional and provincial perspectives while taking into account indigenous realities, the three territories, and municipal affairs. The contributing authors go beyond the major federal transfers to examine the financing of education, cities, infrastructure, and housing. This volume shows that fiscal federalism is much more than simply an aggregate of individual programs and transfers; it highlights the role of actors other than the federal and provincial governments and recalls the importance of territoriality. The book pays close attention to the political dimension of fiscal federalism in Canada, which is at the heart of how the federation functions and is essential to its governance. Fiscal federalism is central to the funding of critical programs through intergovernmental transfers but it is also the focus of political debates on territorial redistribution. In tackling essential questions, *Fiscal Federalism in Canada* contributes to the so-called second-generation fiscal federalism literature taking stock of the critical sociological and political issues at its core.

This is the second edition of the popular Canadian adaptation of Brunner and Suddarth's *Textbook of Medical-Surgical Nursing* by Day, Paul, and Williams.
