in 1984 additive manufacturing represented a new methodology for manipulating matter consisting of harnessing materials and or energy to create three dimensional physical objects today additive manufacturing technologies represent a market of around 5 billion euros per year with an annual growth between 20 and 30 different processes materials and dimensions from nanometer to decameter within additive manufacturing techniques have led to 70 000 publications on this topic and to several thousand patents with applications as wide ranging as domestic uses volume 1 of this series of books presents these different technologies with illustrative industrial examples in addition to the strengths of 3d methods this book also covers their weaknesses and the developments envisaged in terms of incremental innovations to overcome them

solarcom is a french company that is dedicated to supply through solar energy remote telecommunication devices such as repeaters of fiber optics or phone antennas the project is commissioned by solarcom for the eps work team from enit and consists in realize the design of a voltage regulator based on maximum power point tracking algorithms mppt to control the operating point of the power source formed by an array of photovoltaic panels thus improving their

performance and make effective control over the method and charge status of the battery first is done a management is explained in the first chapter how is managed the different resources during the time to finish the project in the deadline in the second chapter is made a little state of art to know how is the actual market in this area and to decide the specifications and price target to make the design of the device is necessary to model the physical environment in which the voltage regulator work to validate step by step through simulation different algorithms and components which will be based regulator the software chosen to realize the mathematical models of the different physical devices on which operation of voltage regulator depends is matlab 2010b the models were made by modeling and simulation tool simulink the hardware design of the device is implemented in solid works and in this chapter is explained every component that is inside the device how it function and why it is selected in this chapter is showed all necessary to build it physically in the software design chapter is explained every function used to make the regulator functional and implemented it in microcontroller the code is made in c language by code warrior for mororolla

nuclear physics 2 explores the applications of various radioisotopes for dating and nuclear medicine imaging it introduces the theoretical and experimental facts from the observation of the red shift in the spectrum of galaxies 1913 and the discovery of the cosmic microwave background 1965 that led to the validation of the big bang model through which all known chemical elements are created via nucleosynthesis processes this introduction is followed by a description of the nuclear reactions involved in primordial stellar and explosive the principles of carbon 14 potassium argon uranium thorium and uranium protactinium dating along with the principles of lead 210 caesium 137 and beryllium 7 radiochronometers applied to dating are also described an overview of the birth of nuclear medicine is given from the first use of radioisotopes as tracers in plant biology in 1913 to the development of positron emission tomography pet in 1975 the method of synthesis of radiopharmaceuticals quality control of radiopharmaceuticals and the experimental methods of the determination of radiochemical purity are presented the description of the principles of pet and single photon emission tomography spect the presentation of the different radioisotopes used in temps and pet as well as the presentation of the main scintigraphies and their uses in nuclear medicine conclude the topics studied

si le concept de garantie reflète avant tout la défiance des parties les unes vis à vis des autres il traduit aussi leur besoin de confiance la garantie offre ainsi un cadre propice aux échanges pour conforter la situation du créancier et la surface financière du débiteur et sécuriser le marché dans les opérations de financement le choix des garanties et contre garanties est guidé à la fois par la volonté et le rôle des parties et par le cadre posé par le marché et la réglementation associée cet ouvrage ambitionne de conceptualiser les rapports entre contrat initial garanties et contre garanties au regard du droit civil et du droit bancaire et financier

la fuite en avant de l'union européenne et dans des accords de libre échange atteint le summum de l'absurdité en les imposant à l'Afrique de l'Ouest dont le PIB par tête est vingt et une fois inférieur au sien. Cet accord de partenariat économique avec lui ferait perdre 76 de ses recettes douanières sur ses importations de l'UE et entraînerait une forte montée du chômage par la perte de compétitivité de ses entreprises. Dans ce contexte, il est très utile d'analyser les multiples manœuvres et contre-vérités utilisées par la commission européenne pour imposer l'AVE de l'AfO et les APEI de Côte d'Ivoire et du Ghana.
