la creazione di interfacce e applicazioni web ha un nuovo e potente strumento di sviluppo che aiuta anche chi non ha conoscenze approfondite di programmazione sfruttando la potenza delle AI generative come ChatGPT. Inoltre, capitolo dopo capitolo, il lettore apprende anche concetti e metodi di programmazione che gli permettono di migliorare i prompt per perfezionare l'output dell'AI. Un manuale perfetto sia per sviluppatori che vogliono ridurre i tempi sia per chi non ha particolari conoscenze di web design ma vuole affrontare la sfida di progettare e realizzare siti web da zero.

The relationship between literature and religion is a crucial element in the definition of every cultural system. Literary traditions developed in such close connection with religious thought, symbolism, institutions, and practices that our understanding of both literary and religious expressions of an age necessarily depends on our consideration of their interconnectedness. This is particularly true for such a controversial age as the European Renaissance, a period that witnessed the rise of national states and the Great Catholic Protestant Schism, a rediscovery of classical antiquity, and a new approach to the biblical text. The flourishing of literature and art and strong politico-religious censorship, a definite advancement in philosophical, scientific, and political thought, and a profound redefinition of the relationships and boundaries between the sacred and profane by taking into account different literary and cultural systems and being open to a plurality of approaches. This volume explores the relationship between literature and religion in a period crucial to the development of European cultural identity, offering both innovative readings of world-famous works and a rediscovery of less familiar texts.

This book takes a long-term approach, spanning from the end of the 16th to the end of the 19th centuries, to explore how men and women in Italy, France, and Spain collected, displayed, and passed down various types of papers. The contributors share a core interest in the relationship between social actors and their paper heritage. The collectors, who come from diverse cultural, social, and gender backgrounds, provide insights into the reasons and processes behind the accumulation, valorisation, and transmission of their paper heritage. Unlike most studies on collecting, this book shifts the focus away from collections and institutions to the owners of the collected objects and their desires for their accumulated papers. This volume covers three centuries and provides insights into the aspirations of collectors and the fate of their papers after transmission. It takes place against the backdrop of major social, political, and cultural changes affecting the Italian Peninsula, the Spanish Monarchy, and France. The cultural interests and the collector networks often extended beyond Europe, as noted by many of the essays in this volume. Paper heritage in Italy, France, Spain, and beyond, from 16th to 19th centuries, will interest scholars and students of early modern and modern European history across various fields, including social and cultural history, intellectual history, gender history, history of collecting, and patronage.

Taking the reader into the heart of one of the fastest-growing religious movements in North America, Sabina Magliocco reveals how the disciplines of anthropology and folklore were fundamental to the early development of neo-paganism and the revival of witchcraft. Magliocco examines the roots that this religious movement has in a Western spiritual tradition of mysticism disavowed by the Enlightenment. She explores too how modern pagans and witches are imaginatively reclaiming discarded practices and beliefs to create religions more in keeping with their personal experience of the world as sacred and filled with meaning. Neo-pagan religions focus on experience rather than belief, and many contemporary practitioners have had mystical experiences. They seek a context that normalizes them and creates in them new spiritual dimensions that involve change in ordinary consciousness. Magliocco analyzes magical practices and rituals of neo-paganism as art forms that reanimate the cosmos and stimulate the imagination of its practitioners. She discusses rituals that are put together using materials from a variety of cultural and historical sources and examines the cultural politics surrounding the movement. How the neo-pagan movement creates identity by contrasting itself against the dominant culture and

how it can be understood in the context of early twenty first century identity politics witching culture is the first ethnography of this religious movement to focus specifically on the role of anthropology and folklore in its formation on experiences that are central to its practice and on what it reveals about identity and belief in twenty first century north america
