steiners analyzes how and why brodie s understanding of weapons of unparalleled explosive
force led him to posit the need for revolutionary strategic thinking in broadminded analytic
method and in the focus upon cities as nuclear targets he shows the tremendous effect brodie
s work had on the intellectual climate in which policy is determined particularly in his frequent

the so called phony war from september 1939 to may 1940 occupies a peculiar yet distinct
place in popular memory all the sensations of war except the fighting were present yet instead
of massed air attacks and great land battles very little happened the british government was
said to be complacent and the people downright bored then france fell to german attack and
the small british army was evacuated minus its equipment from dunkirk reaction to this major
strategic catastrophe was naturally to blame the men deemed guilty for bringing the nation to
the verge of humiliating defeat in sharp contrast to previous studies smart argues that there
was more to the phony war than governmental complacency that the period was more than a
foolish or frivolous ante chamber to a later more heroic phase the extent to which the guilty
men verdict on the first nine months of britain s second world war has stuck remains surprising
the notion that the phony war was a necessary indeed over determined prelude to catastrophe
has become cemented over time examining the workings of the anglo french leadership during
this period smart picks this thesis apart and argues that disaster was not necessarily still less
inevitably just around the corner he concludes that anglo french decision making during this
time was basically sound that the soldiers were well equipped and in good heart and that there

was no malaise eating away at the entente this study offers a challenging reappraisal of the phony war from a british perspective
