the brooding figure of stalin hovered over communist power in russia for most of its 74 years despite its achievements his regime practiced lawlessness and terror over a wide span of territory and people the question that arises is how was he able to exercise dictatorial rule over 170 million people in the many countries making up the soviet union for so long author hostettler questions whether a different road could have been taken after the bolshevik revolution had succeeded he concludes that stalin s russia signals a warning against taking a wrong path in seeking human liberty and equality revolutionary law is no law at all and is no substitute for the

in his reexamination of the origins of the stalinist state during the formative period of rapid industrialization in the late 1920s and early 1930s david r shearer argues that a centralized state controlled economic system was the consciously conceived political creation of stalinist leaders rather than the inevitable by product of socialist industrialization focusing on the different economic and bureaucratic cultures within the industrial system shearer reconstructs the debates in 1928 and 1929 over administrative financial and commercial reform he uses information from recently opened archives to show that attempts by the state s trading organizations to create a commercial economy enjoyed wide support offering a model that combined planning and rapid industrialization with social democracy and economic prosperity in an effort to crush the syndicate movement and establish tight political control over the economy stalinist leaders intervened with a program of radical reforms shearer demonstrates that professional engineers planners and industrial administrators in many cases actively supported the creation of a powerful industrial state unhampered by domestic social and economic constraints the paradoxical result shearer shows was a loss of control the overly centralized system that emerged during the
