this volume provides unique and valuable firsthand accounts of the most important longitudinal studies of attachment presented are a range of research programs that have broadened our understanding of early close relationships and their role in individual adaptation throughout life in addition to discussing the findings that emerged from each study leading investigators offer rare reflections on the process of scientific discovery themes addressed include the complexities of designing studies that span years or even decades challenges in translating theoretical constructs into age appropriate assessments how bowlby's original models have been refined and expanded and how attachment interacts with other key influences on development

this book is the first to bring together researchers in individual differences in personality and temperament to explore whether there is any unity possible between the temperament researchers of infancy and childhood and the major researchers in adult personality prior to the workshop which resulted in this volume the existing literature seemed to document a growing consensus on the part of the adult personality researchers that five major personality dimensions the big five might be sufficient to account for most of the important variances in adult individual differences in personality in contrast to this accord the literature on child and infant individual differences seemed to offer a wide variety of opinions regarding the basic dimensions of difference in personality or temperament the editors believed that they could encourage researchers from both the adult and child areas to consider the importance of a lifespan conceptualization of individual differences by discussing their research in terms of a continuity approach written by some of the most distinguished scholars from great britain continental western europe and eastern europe as well as the united states and canada the chapters present a cross cultural view of both adult personality and temperament in infancy and childhood by sharing their recent data techniques and theoretical speculations the chapter authors communicate the research enthusiasm engendered by the growing consensus of the adult big five as well as the exciting prospects of an integrative program of research from infancy to adulthood that will clarify and consolidate what is now a disparate set of methods theory and findings across the lifespan the editors suggest that this volume will have considerable heuristic value in stimulating researchers to conceptualize their work in developmental lifespan approaches that will lead to a consolidation of individual differences research at every age

developmental psychology from infancy to adulthood 3rd edition continues to bring together a balanced focus on australian and international research contributions in developmental psychology students and lecturers alike will find this text addresses the issues of lifespan development in a rigorous and challenging way using a thematic rather than chronological approach international and national research on graduate attributes consistently identifies critical thinking as one of the most important skills for psychology students the inclusion of critical thinking for group discussion at the end of each chapter is designed to encourage students in the development of this key skill these questions help students develop the ability to engage in discussions on truth and validity and evaluate the relative importance of ideas and data students learn by doing and this is encouraged through interactive features such as stop and review research focus boxes and practical exercises which engage them in group

discussion and challenge them to delve into complex and cross domain analysis of lifespan development concept maps at the start of each chapter provide students with a visual snapshot of the chapter content

clinical management of congenital heart disease from infancy to adulthood this practical resource for the clinical management of congenital heart disease offers essential instruction on the presentation and treatment of congenital heart defects throughout the life stages edited by renowned pediatric cardiologist douglas s moodie md ms from texas children s hospital and authored by seasoned practitioners with vast clinical experience this book expertly addresses the continuum of clinical care issues at distinct stages of growth and development fetuses neonates and infants children adolescents and adults organized by specific congenital heart condition each well referenced and highly organized chapter examines the clinical features diagnostic testing management and outcomes associated with age groups and includes tips and tricks gleaned from years of practice in the field of pediatric cardiology this exceptionally readable text will serve as both a great learning tool and a handy reference for practitioners students and nurses who need to stay up to date on the unique clinical challenges that chd presents in the neonate to the adult audience suited for the general pediatrician cardiology fellow pediatrics resident and medical student practicing cardiologists pediatric and internist and cardiology nurse practitioners will also find it a good and quick reference source that is very readable

the combined features that distinguish this text from other titles can be summarized with an acronym care c utting edge research a pplied developmental science r eadability e ssential knowledge written by respected child adolescent and adulthood development experts this authoritative and chronologically organized text presents an integrated perspective on lifespan development the authors write in an engaging manner synthesizing biological social cultural and socioeconomic influences as opposed to organizing content around developmental themes incorporation of classic and cutting edge research includes extensive coverage of new research in developmental neuroscience which has transformed the study of lifespan development by introducing brain maturation at the same time the text emphasizes the application of developmental psychology to real world problems focusing on the ways in which knowledge of child development can inform social policy and practice in the fields of child care education mental health and family life the text also examines the many fascinating changes that take place through adulthood to help students answer the important question who will i become tomorrow and with a separate epilogue that focuses on death and dying the book takes students on a developmental journey from our first breath to our last reflecting the authors combined expertise the broad array of real life examples resonate with students from different backgrounds and fields of study and with different occupational goals in mind with its distinctive and effective combination of cutting edge research applications readability and essential knowledge this text helps students understand and appreciate what today s scientists are discovering about human development across the lifespan how they study the process and how this knowledge can be used to improve the lives of infants children adolescents and adults around the world

hutchison a child therapist explores trauma related topics pertaining to children of all ages from a variety of cultures and countries in this reference for professional and nonprofessional caregivers of children who have been traumatized
