testing and commissioning is by definition a systematic and documented process designed to establish intent assumptions codes and standards it consists of verifying the operation of mainly mechanical and electrical system components under various load conditions verifying proper interactions between systems documenting that systems performance meets design criteria and instructing the building operators during the process in systems operation the consequences of bad or unprofessional management techniques will usually surface during this time of the project's life because in addition of being a period where building equipments and systems are tested it is also a period of assessment of the parties project management philosophies today more and more people are becoming aware of the importance of this phase and the critical role it plays in the overall enhancement of the project management discovering the errors in the later stages of the project and correcting them during commissioning will automatically lead to delays and additional costs hence avoiding the problems from the start instead of correcting them through an in depth analysis and understanding of this

phase will be interesting to deduce valuable lessons about better management practices as applied to the implementation of building systems from day 1 of the project's life. This paper will analyze thoroughly the testing and commissioning phase of several building construction projects in an effort to highlight the recurrent problems facing various parties involved. Any methodology which could help foresee problems is bound to be well received by the three major parties involved in a project: owner, engineer, and contractor. Where all three are eager to complete the project on time, on budget, and with the quality required. Subsequently, the paper will try to come up with a set of recommendations which assist in reducing the number of errors, avoiding delays, and most importantly, decreasing or containing additional costs. The paper will serve as a guideline and lays down the foundations for a healthier project management practices.
