biochemistry is the branch of science which deals with the biomolecular i.e. carbohydrates, proteins, nucleic acids etc. the subject is highly advanced and involves tremendous biochemical principles and techniques which are revised every day. The question bank has been written to make biochemistry easy for students. The answers are brief to the point and informative. The book starts with biophysics and instrumentation which covers principles, working uses of the instruments frequently encountered in the biochemistry laboratory. Various questions are provided for carbohydrates, lipids, nucleic acids, enzymes etc. Special efforts have been put to write questions on hormones, diet and nutrition and organ function tests. This book will be useful for students of various disciplines including medical, dental, homoeopathy, graduation courses of different Indian universities also.

a comprehensive collection of objective and subjective questions designed to aid in the revision and assessment of biochemistry topics for exams.

in contrast to the second edition the third edition of fungi and food spoilage is

evolutionary rather than revolutionary the second edition was intended to cover almost all of the species likely to be encountered in mainstream food supplies and only a few additional species have been included in this new edition the third edition represents primarily an updating of taxonomy physiology mycotoxin production and ecology changes in taxonomy reflect the impact that molecular methods have had on our understanding of classification but it must be said have not radically altered the overall picture the improvements in the understanding of the physiology of food spoilage fungi have been relatively small reflecting perhaps the lack of emphasis on physiology in modern mic biological science much remains to be understood about the specificity of particular fungi for particular substrates of the influence of water activity on the growth of many of the species treated and even on such basic parameters as cardinal temperatures for growth and the influence of pH and preservatives since 1997 a great deal has been learnt about the specificity of mycotoxin production and in which commodities and products specific mycotoxins are likely to occur changes in our understanding of the ecology of the included species are also in most cases evolutionary a great number of papers have been published on the ecology of foodborne fungi in the past few years but with few exceptions the basic ecology of the included species remains
