unfree labor has not disappeared from advanced capitalist economies in this sense the debates among and between marxist and orthodox economic historians about the incompatibility of capitalism and unfree labor are moot the international labour organisation has identified forced coerced and unfree labor as a contemporary issue of global concern previously hidden forms of unfree labor have emerged in parallel with several other well documented trends affecting labor conditions rights and modes of regulation these evolving types of unfree labor include the increasing normalization of contingent work and by extension the undermining of the standard contract of employment and an increase in labor intermediation the normative political and numerical rise of temporary employment agencies in many countries in the last three decades is indicative of these trends it is in the context of this rapidly changing landscape that this book consolidates and expands on research designed to understand new institutions for work in the global era this edited collection provides a theoretical and empirical exploration of the links between unfree labor intermediation and modes of regulation with particular focus on the evolving institutional forms and political economic contexts that have been implicated in and shaped by the ascendancy of temp agencies what is distinctive about this collection is this bi focal lens it makes a substantial theoretical contribution by linking disparate literatures on and debates about the co evolution of contingent work and unfree labor new forms of labor intermediation and different regulatory approaches but it further lays the foundation for this theory in a series of empirically rich and geographically diverse case studies this integrative approach is grounded in a cross national comparative framework using this approach as the basis for assessing how and to what extent temporary agency
