Food composition data are useful throughout the food system for nutrition sensitive agriculture, improved processing methods that ensure greater nutrient retention in foods, nutrition labelling and to inform, educate and protect consumers through food based dietary guidelines, nutrition education and communication and legislation. The FAO/INFOODS Food Composition Table for Western Africa (WAFCT 2019) is an update of the West African Food Composition Table of 2012 which lacked some important components, foods and recipes. WAFCT 2019 contains almost three times as many food entries and double the number of components with increased overall data quality. Many of the data points from WAFCT 2012 have been replaced with better data, mostly analytical data from Africa with a special emphasis on Western Africa. These improvements are essential to understanding the nutrient composition of foods in the region and to promoting their appropriate use. WAFCT 2019 is the result of four years of collaboration among INFOODS network researchers in Africa and the Nutrition and Food Systems Division of FAO and was developed as part of the International Dietary Data Expansion (IDDEX) project implemented by Tufts University's Gerald J. and Dorothy R. Friedman School of Nutrition Science and Policy with funding from the Bill and Melinda Gates Foundation. These new data from WAFCT 2019 will support further research towards an expanded and improved evidence base and will support better, more informed decisions and effective policies and programmes for improved nutrition in Africa.
