in linguistic theory robert de beaugrande analyses linguistic theories not as abstract ideas or theses but as the process and product of theoretical discourse he argues that the best documentation of this discourse can be found in the fundamental works of major linguists from ferdinand de saussure to teun van dijk and walter kintsch he therefore employs the highly unusual strategy of a close reading of these works as discourse performances and strives to uncover their main points and characteristic moves in the linguist s own words through this approach the reader is able to appreciate and understand the variety and controversy among linguistic theories as they have emerged and developed in interaction with each other special scrutiny is allocated to the issue of how far the active practice of the linguists followed their own theories and proposals and why the author concludes by assessing the prospects for linguistics to be drawn from the retrospect in the previous chapters

in a controversial look at the study of linguistics today mortéza mahmoudian examines twentieth century theories of language in light of empirical evidence in the past linguists have had to choose between a general linguistic theory aimed at universal explanatory power and specific limited linguistic models arguing that at various levels of linguistic analysis different theories offer more or less explanatory power mahmoudian makes a persuasive case for an integrated approach incorporating the strengths of both methods the author begins with the identification of principles which despite differences in terminology are held in common by most twentieth century linguists he shows the implications merits and shortcomings of the major schools of linguistic thought as well as the techniques one can use in gathering data ranging over a wide variety of international linguistic thinking mahmoudian takes up the question of what he calls experimentation or the extent to which the application of certain linguistic theories have validity in constucting models simultaneously a survey of the current state of linguistic theory and a case for the necessity of empirical verification in linguistics modern theories of language builds a bridge across the gulf between many long standing conflicts in the theory of language accessibly written this provocative work predicts future theorerical and epistemological developments and will prove essential reading for students and scholars of linguistics as well as specialists in cognitive psychology and romance languages

for roy harris the fundamental problem about linguistics is that it has been led astray by the fact that we are capable intellectually of decontextualising our own verbal behaviour a whole interlocking system of doctrines about forms meanings and communication has arisen designed to support the idea that one particular kind of decontextualising analysis is a prerequisite for rather than a retrospective reflection on that behaviour against this in 13 essays collected here for the first time harris argues for a fresh start which recognises that we create language as we go both as individuals and as communities just as we create our social structures forms of artistic expression moral values and everything else we call civilisation if harris s thought can be put in a nutshell it is that all utterances whether written or spoken have to appear in a context and that context is an integral part of the utterance there is no such thing as a contextless utterance

most of the papers collected in this volume concentrate on the history of linguistic ideas in france and italy in the modern period from the renaissance to the present day some of them are specifically focused on the links between the two traditions of reflection on language the contributions have a common methodological outlook the authors do not believe that the history of linguistic ideas is a separate activity from research on language or that it is marginal with respect to the latter on the contrary they are convinced that in contemporary research into language we can still discern the influence positive or negative as this may be of factors deriving from the sometimes distant past a historical analysis of these factors
