the rise of corporate groups in the last century dictates a shift in the income tax law instead of treating each company as a separate taxpayer the tax consolidation regime is increasingly common antony ting presents the first comprehensive comparative study of eight consolidation regimes in australia france italy japan the netherlands new zealand spain and the usa in the study he critically analyses and compares alternative policy options with respect to ten key structural elements the study improves understanding of the design and implementation of consolidation regimes and sets the stage for the search for a model it provides valuable information with respect to the best practices as well as the pitfalls in the design of a consolidation regime the book is essential to countries contemplating the introduction of a new consolidation regime and offers important insights into the management of such a complex structure through careful policy orientated choices

consolidation of the tax base in the european union is expected to curve compliance costs and reduce prodtit shifting a number of proposals for

consolidation from the european commission are simulated with the applied general equilibrium model cortax we show that benefits from consolidation are offset by two weaknesses in the proposals for a common consolidated tax base formula apportionment which is needed to allocate the consolidated taxable profits across jurisdiction creates new tax planning possibilities for mnes and allows them to benefit from existing tax rate differentials in the european union in addition it triggers tax competition as member states may attract foreign investment by reducing their tax rates the second distortion is an unlevel playing field which is introduced if only part of the firm participate in the consolidation the gains from consolidation can be fully grasped if it is obliged for all firms and if it is accompanied by a harmonisation of the tax rate

descriptors laws statutes

preface this book contains the proceedings of the international tax conference on the common consolidated corporate tax base ccctb that was held in berlin on 15-16 may 2007 the conference was jointly organised by the german federal ministry of finance the centre for european economic research zew mannheim and the max planck institute mpi for intellectual property competition and tax law munich more than 250 participants from all over europe and other regions scholars politicians business people and tax administrators discussed the european commission's proposal to establish a ccctb three panels of tax experts evaluated the common tax base with respect to structural elements consolidation allocation international aspects and administration the conference made clear that the ccctb has the potential to overcome some of the most intriguing problems of corporate income taxation within the common market common tax accounting rules substantially reduce compliance and administrative costs consolidation of a group's profits and losses effects cross-border loss compensation which removes a major tax obstacle for european cross-border investment at the same time tax planning with respect to financing and transfer pricing is pushed

back within the european union moreover as far as the ccctb applies member states are able to remove tax provisions that are targeted at cross border tax evasion and that might be challenged by the jurisdiction of the eu pean court of justice
