this book focuses upon the legacies sought by cities that host major sports events it analyses how governments the ioc and others define and measure legacy it also focuses upon the challenges and opportunities facing future host cities of mega events and questions what the global shift in geographical location of mega events means for sports development and the business of sport and what are the attractions for cities seeking to harness the hosting of a mega event and whether there may be longer term consequences for the bidding and hosting major sporting events

the aim of the book is to examine the transformation of the city in the late 20th century and explore the ways in which city life is structured the shift from modern industrial to information consumption based post modern cities is traced through the text the focus is not just on america and europe but also explores cities in other parts of the world as city growth in the twenty first century will be predominantly outside of these regions

the financial crisis has given new impetus to the struggles of oppositional urban social movements that have long emphasized the injustice destructiveness and unsustainability of capitalist forms of urbanization through contributions by urban theorists sociologists geographers political scientists planners and activists the volume explores the possibilities for and constraints upon critical urban theory and

practice today ideas are linked by a common theme the difficulties that are created for people by cities organized for profit and the existing trends struggles and movements that might change their course to construct alternative forms of urbanism the slogan cities for people not for profit thus sets into stark relief what the authors view as a central political objective for ongoing efforts at once theoretical and practical to address the global urban crises of our time

the revised and updated second edition of introduction to cities explores why cities are such a vital part of the human experience and how they shape our everyday lives written in engaging and accessible terms introduction to cities examines the study of cities through two central concepts that cities are places where people live form communities and establish their own identities and that they are spaces such as the inner city and the suburb that offer a way to configure and shape the material world and natural environment introduction to cities covers the theory of cities from an historical perspective right through to the most recent theoretical developments the authors offer a balanced account of life in cities and explore both positive and negative themes in addition the text takes a global approach with examples ranging from berlin and chicago to shanghai and mumbai the book is extensively illustrated with updated maps charts tables and photographs this new edition also includes a new section on urban planning as well as new chapters on cities as contested spaces exploring power and politics in an urban context it contains information on the status of poor and marginalized groups and the impact of neoliberal policies material on gender and sexuality and presents a greater range of geographies with more attention to european latin american and african cities revised and updated introduction to cities provides a complete introduction to the history evolution and future of our modern cities
