incluye la evaluación y la intervención del bebé dentro del contexto de los trastornos del neurodesarrollo describe ampliamente los factores de riesgo pre peri y posnatales a la vez que profundiza en la prematuridad presenta no solo las condiciones clínicas sino también el desarrollo de los sistemas vestibular somato sensorial visual o motor postural entre otros así como de las funciones cognitivas y de la realidad psicoafectiva del niño además describe la vinculación de los trastornos del neurodesarrollo con estos sistemas otorga una gran relevancia a los factores ambientales tanto en la evaluación como en la intervención donde la educación de la familia es clave organiza las intervenciones en un nuevo paradigma interdisciplinar cuenta con la participación de profesionales de referencia en distintas disciplinas trastornos del neurodesarrollo un abordaje integrativo en la evaluación y el tratamiento afronta la complejidad de ciertas condiciones clínicas que afectan a una gran parte de la población infantil aporta una

visión completa de los trastornos que afectan al bebé antes del nacimiento y durante sus primeros años y que continúan en la adolescencia y la edad adulta pone el acento en la necesidad de una evaluación global del funcionamiento de estos niños al margen del diagnóstico tDAH, TEA, etc. lo que posibilita una intervención más individualizada y enmarcada en un modelo biopsicosocial.

En el transcurso de las últimas décadas la educación ha experimentado una transformación sin precedentes gracias a la irrupción de las tecnologías emergentes. Conceptos que antes parecían reservados al ámbito de la ciencia ficción como la inteligencia artificial, la realidad aumentada, el aprendizaje automatizado y la realidad virtual han comenzado a integrarse de manera activa en los contextos educativos redefiniendo las formas de enseñar, aprender y evaluar. Este libro, titulado *Horizontes de aprendizaje con tecnologías emergentes en el contexto educativo*, surge como una respuesta a la necesidad de explorar y documentar estas transformaciones brindando a la comunidad académica un panorama amplio y crítico de las experiencias e innovaciones en este ámbito. Este libro reúne un conjunto de investigaciones prácticas y proyectos de innovación llevados a cabo por destacados profesionales de diferentes áreas del conocimiento quienes comparten un compromiso común: potenciar el aprendizaje mediante la integración creativa y significativa de tecnologías emergentes. A lo largo de sus capítulos se presentan estudios que abordan desde la implementación de dispositivos IoT en aulas inteligentes hasta experiencias con realidad aumentada en la formación inicial docente, pasando por propuestas de aprendizaje activo mediante inteligencia artificial y realidades extendidas.

Las universidades precisan asegurar las competencias de los profesionales para conseguir que los servicios que prestan en la comunidad cumplan con los estándares y recomendaciones de calidad, la seguridad y los derechos del paciente/cliente, la organización y la gestión, la estructura física y los recursos. Son algunos de los principales focos de interés. La adquisición de las competencias profesionales en los estudiantes no está vinculada únicamente a la memorización de conceptos teóricos como indica la declaración de Bolonia en 1999, ni siquiera a la adquisición de habilidades técnicas. Competencias como el razonamiento clínico, la toma de decisiones, la resolución de problemas y las habilidades en las relaciones interpersonales tienen en la actualidad un peso mayor en el proceso de aprendizaje y en la futura inserción laboral de los estudiantes.

Designed as a handy quick reference guide, this book takes a uniquely visual evidence tables approach to make it easy for clinicians to locate relevant evidence of the diagnostic utility of commonly utilized tests and measures. It features 281 evidence tables with essential information clinicians need to make appropriate decisions on clinical tests for their patients.

Al hablar de la novela española de posguerra es inevitable hablar de la censura y del papel negativo que tuvo en su evolución. Sin embargo, también tuvo un sentido positivo al estimular la búsqueda de técnicas para burlarla. Esto afectó de manera especial a la producción femenina dada la hostilidad del régimen franquista a cualquier tipo de intento de liberación por parte de la mujer. En general, se puede decir que la literatura femenina de posguerra fue ampliamente minusvalorada, sino directamente obviada. Solamente la obra de tres o cuatro escritoras ha salido airosa de la crítica de la época: Laforet, Matute o Martín Gaité. Las causas de este olvido son diversas. De una parte, se plantea el doble rasero que se aplica en lo referente al contenido: a la hora de evaluar la producción femenina y la masculina, pero también se puede considerar la dificultad

para encuadrar la narrativa hecha por mujeres en las clasificaciones elaboradas por y para la produccion masculina
