this book provides a comprehensive overview of protestant christianity in korea it outlines the development of christianity in korea before protestantism considers the introduction of protestantism in the late nineteenth century and its widening and profound impact and goes on to discuss the situation up to the present throughout the book emphasises the importance of protestantism for korean national life highlights the key role protestantism has played in korea s social political and cultural development including in north korea whose first leader kim il sung was the son of devout protestant parents and demonstrates how protestantism continues to be a vital force for korean society overall

this volume brings together for the first time a significant body of professor barnes scholarly writing on early korean state formation integrated so that successive topics form a coherent overview of the problems and solutions in peninsular state formation

this report has a special focus on low income groups jobseekers and workers and policies geared towards closing the considerable gaps these groups are facing around income and employment support in korea it concludes that significant additional action will be needed to make income

asian business conglomerates have clearly been successful agents of growth mobilizing capital borrowing technology from abroad and spearheading asia s exports however these firms have long had a number of organisational and financial weaknesses including heavy reliance on debt that

make them vulnerable to shocks nowhere was this more true than in Korea where the large corporate groups known as chaebol have dominated the economic landscape this collection of essays by leading political scientists and economists provides a comprehensive look at the chaebol problem in the wake of the Asian financial crisis the authors consider the historical evolution of the chaebol and their contribution to the onset of economic turmoil in 1997 the book analyses the government's short run response to corporate and financial distress and outlines an agenda for longer term reform of the financial system corporate governance and the politics of business government relations

South Korea's economic miracle is a well known story however today Korea is confronting a new set of internal and external risks which may foreshadow the next crisis the Korean economy has been struggling with the faltering growth momentum and the rise of unprecedented socio economic problems over recent years well before the pandemic crisis after abrupt downshifts to markedly slower growth in the early 2000s economic growth has continued to decelerate Koreans are grappling with slow income growth all time high household debt high youth unemployment inequality and social polarization politics is in disarray and is incapable of directing social discourse for the common good rapid population aging along with the world's lowest fertility rates stokes fears of japanification simultaneously disruptive technologies and fast changing business environment such as the rise of China clash with a range of long standing structural problems the contemporary challenges are radically different from those seen in the early stages of industrialization there are multiple risks that threaten to self perpetuate low or stagnant growth over the next decade or so if not an outright financial crisis motivated by these latest developments this book seeks to provide a timely and in depth analysis of key current issues and foreseeable challenges of the economy with a provocative reassessment of its future based on extensive new empirical works it examines the underlying causes of the socio economic problems in a constructive spirit it puts in perspective what would constitute critical elements of ideal policy solutions and the direction of the future government's role

most recent work on the nature of experiment in physics has focused on big science the large scale research addressed in Andrew Pickering's *Constructing Quarks* and Peter Galison's *How Experiments End* this book examines small scale experiment in physics in particular the relation between theory and practice the contributors focus on interactions among the people materials and ideas involved in experiments factors that have been relatively neglected in science studies the first half of the book is primarily philosophical with contributions from Andrew Pickering Peter Galison Hans Radder Brian Baigrie and Yves Gingras among the issues they address are the resources deployed by theoreticians and experimenters the boundaries that constrain theory and practice the limits of objectivity the reproducibility of results and the intentions of researchers the second half is devoted to historical case studies in the practice of physics from the early nineteenth to the early twentieth century these chapters address failed as well as successful experimental work ranging from Victorian astronomy through Hertz's investigation of cathode rays to Trouton's attempt to harness the ether contributors to this section are Jed Z Buchwald Giora Hon Margaret Morrison Simon Schaffer and Andrew Warwick with a lucid introduction by Ian Hacking and original articles by noted scholars in the history and philosophy of science this book is poised to become a significant source on the nature of small scale experiment in physics
