this volume challenges prevailing understanding of the two great founders of sociological thought in a detailed and systematic way the author demonstrates how marx and durkheim gradually developed the fundamental frameworks for sociological materialism and idealism while most recent interpreters of marx have placed alienation and subjectivity at the centre of his work professor alexander suggests that it was the later marx s very emphasis on alienation that allowed him to avoid conceptualizing subjectivity altogether in durkheim s case by contrast the author argues that such objectivist theorizing informed the early work alone and he

demonstrates that in his later writings durkheim elaborated an idealist theory that used religious life as an analytical model for studying the institutions of secular society

revised for the first time in over thirty years this edition of emile durkheim s masterful work on the nature and scope of sociology is updated with a new introduction and improved translation by leading scholar steven lukes that puts durkheim s work into context for the twenty first century reader the rules of sociological method represents emile durkheim s manifesto for sociology he argues forcefully for the objective scientific and methodological underpinnings of sociology as a discipline and establishes guiding principles for future research the substantial new introduction by leading durkheim scholar steven lukes explains and sets into context durkheim s arguments lukes examines the still controversial debates about the rules of sociological method s six chapters and explains their relevance to present day sociology the edition also includes durkheim s subsequent thoughts on method in the form of articles debates with scholars from other disciplines and letters the original translation has been revised and reworked in order to make durkheim s arguments clearer and easier to read this is an essential resource for students and scholars hoping to deepen their understanding of one of the pioneering voices in modern sociology and twentieth century social thought

the second volume of the landmark study examining the work of sociology's defining thinkers from the turn of the nineteenth century to the interwar period. Main Currents in Sociological Thought remains a foundational synthesis in the field. In this second and final volume of his classic survey, Raymond Aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century: Durkheim, who continued Comte's quest for a science of society and a scientific validation of morality; Pareto, the Italian neo-Machiavellian who emphasized the elitist character of all societies; and Weber, the German sociologist who reflected critically on the prospects for human freedom in an age of disenchantment. Bringing together penetrating intellectual portraits of these great thinkers and close readings of their most consequential texts, *Main Currents in Sociological Thought* highlights the historical and intellectual context within which each man wrote and draws out their works' enduring insights and influence in the field today.

This second edition is a thoroughly revised, expanded version of the bestselling student text in classical social theory. Author Kenneth Morrison provides an authoritative, accessible undergraduate guide to the three pivotal figures in the classical tradition: readable and stimulating. The second edition of *Marx, Durkheim, Weber: Formations of Modern Social Thought* explains the key ideas of these thinkers and situates them in their historical and philosophical contexts.

This study of Durkheim seeks to help the reader to achieve a historical understanding of his ideas and to form critical judgments about their value to some extent. These two aims are contradictory: on the one hand, one seeks to understand what Durkheim really meant, how he saw the world, how his ideas related to one another, and how they developed; how they related to their biographical and historical context; how they were received; what influence they had; and to what criticism they were subjected. What was it like not to make certain distinctions, not to see certain errors of fact or of logic, not to know what has subsequently become known? On the other hand, one seeks to assess how valuable and how valid are the ideas; to what fruitful insights and explanations do they lead; how do they stand up to analysis and to the evidence; what is their present value? Yet it seems that it is only by inducing oneself not to see and only by seeing them that one can make a critical assessment. The only solution is to pursue both aims, seeing and not seeing simultaneously. More particularly, this book has the primary object of achieving that sympathetic understanding without which no adequate critical assessment is possible. It is a study in intellectual history which is also intended as a contribution to sociological theory.
